GFAA thanks those many anglers, association executives and others who have contributed to the content of this Journal. The Association welcomes unsolicited content and comments from anglers and clubs through its communications channels. The Association will proudly share the achievements of fellow anglers.

To be on the list for the latest in GFAA communication please send your request to info@gfaa.asn.au

HISTORICAL SPECIAL FEATURE | P29

"Through all this, anglers from all over have travelled to picturesque Port Stephens to sample the delights, frustrations and triumphs of competing in what became the premier game fishing competition on the Australian calendar."

THANKS

GFAA would like to thank the many who have volunteered content, ideas and their time to the production of this 2025 Journal. For those whose names may have been missed, our apologies, your efforts are nonetheless very much appreciated.

Peter Babarskas, Ian Bladin, Leyland Campbell, Lisa Collins, Michelle Curtin, Phil Dance, Olivia Gilham, Ben Knaggs, Julie Horton, Tim Massurit, John McIntyre, Ian Meads, Kevin Oates, Dr Julian Pepperell, Jai Prolongeau, Jason Rogers, Nigel Rushworth, Katie Russell, Doug Sanderson, Cassie Schofield, Michelle Sims, Andy Smith, Glen Sparks, Alexandra Steulten Koster, Grahame Williams, Corey Walker, Leanne Wilson and Karen Wright .

Message from the President

Another year is quickly unfolding and my hope is that you all manage to get out onto the water to enjoy our sport, the camaraderie that goes along with it and the opportunity to spend quality time with those close to you.

Over the past few months, GFAA website has been upgraded and is now much more mobile phone friendly. Following on from this, we have created a GFAA App, which is a real step forward for all. It will be kept updated, so by downloading it before a day's fishing will give you the most recent information and even if you don't have coverage at sea, everything will be there at your fingertips.

It seems that little has changed over the past twelve months, as we find ourselves battling hard to counter the threats we face to maintain the ability to pursue our sport. Again at the forefront of those threats is offshore wind and the huge unknowns associated with its implementation. There are areas of offshore wind proposed for most States, the sheer size of them is frightening, particularly because they all will have impact on significant offshore fisheries.

The Association believes that, as citizens, we have rights to fair and equitable access to our oceans, a significant social licence to fish and to enjoy the benefits. These include the effects on well-being, social interactions and the socio-economic benefits to regional communities that evolve from those things. At present we have no real idea of what restrictions will be placed on us and how the proponents intend to allow us that fair access to our fishing grounds. Clearly the construction phases will cause huge disruptions and given the scope of works, it may mean our boats are tied up for years.

The Association has taken a reasoned approach to offshore wind, with a view to ensuring that we continue to be involved in discussions and negotiations as a means of standing up for the rights of all recreational fishers and the communities that benefit from our presence. We have a number of strategies in place to counter the threat and are very focused on the need to for local knowledge and expertise to formulate individual plans for each region.

So, to be clear on where we sit with this at the present time.

The Association opposes the development of offshore wind in all regions. We will continue that opposition until such time as we can be totally satisfied that our concerns regarding, fair and equitable access and that there will be no detrimental effect on the marine

environment and all species that occupy it.

Advocacy on behalf of all is taking much more of our time in comparison to a generation ago and we will continue that role to the very best of our ability. One other issue we are involved in is shark depredation, which is a huge problem across all fisheries, not just in this country, but globally. This has been an ongoing issue for some years, finally we are seeing some action from the various authorities on this, but it is a battle that is not going to be easy to win.

Also forthcoming is a review of Commonwealth Marine Parks and as major stakeholders, we will be closely monitoring any new proposals and will be working closely with the Australian Recreational Fishing Foundation to ensure favourable outcomes.

With everything that's going on, we're fortunate to have a number of people who are committed to working for the good of all. The Executive, members of our sub-committees, particularly the offshore wind group, deserve our thanks for the time and effort that they've put in on everyone's behalf. That thanks also deserves to be passed on to all of those serving as part of a large volunteer organisation, including members of State Executives and those looking after our grass roots – the Clubs. Thank you all for what you do and I would urge anyone with the same passion for our sport to consider putting their hand up to help, even if it's only in the smallest of ways.

The annual journal cannot be published without the help and contributions of a number of people and they deserve our thanks. In particular, thank you to Peter Coote for all the hard work and time he has put into collating another very professional publication.

I leave you with my best wishes for 2025 and the hope that many of your fishing dreams are realised.

Tight lines,

A handwritten signature in black ink that reads "Ian Bladin". The signature is written in a cursive, flowing style.

Ian Bladin, President

Why join a GFAA-affiliated club?

The Game Fishing Association of Australia (GFAA) is the longest established national fishing association in the world. It has been, and remains, a model and example for game fishing associations around the world. As such, the GFAA is affiliated with the International Game Fish Association (IGFA) and plays an active part in the leadership of the sport of game fishing on a world level.

The constitutional membership of the GFAA is the Australian States and the Northern Territory (the Canberra Game Fishing Club is affiliated with the New South Wales Game Fishing Association). Thus, game fishermen, wherever their place of residence, have a voice and representation – just as was planned by those who founded the national body in 1938.

Each of the State and Northern Territory branch memberships is made up of affiliated clubs. The club members – the fishermen – in turn, receive the benefit of membership.

There are many reasons for the success and longevity of the GFAA, all of which are directly related to benefits for the members.

These include:

- The administration of club, State and Australian records for male, lady and junior anglers – not only traditional offshore game fishing records, but also fly and land-based game.
- Organised club structures that help give knowledge on technique and where to find fish. club-organised tackle and 'how-to' instructional nights and the like.
- Fellowship and social functions within the clubs.
- Competition, both intra- and inter-club. That is, competition with other clubs, competition within the State and national competition.
- Representation for club, State or country in international competition. The GFAA and members of its state associations and member clubs are welcome and recognised at international tournaments. Such teams have competed successfully in international tournaments in New Zealand, Australia, Hawaii, Mexico, Central America, Tahiti and Nova Scotia.
- The dissemination and application of knowledge, which is important over a lifetime of fishing with a GFAA club.
- Receipt of member club and State associations' newsletters and the *GFAA's Official Game Fishing journal*.

However, one of the most important benefits of membership of clubs affiliated with the GFAA is to give input to club, State and national executives with governments and related organisations and departments. This involvement ideally leads to representation on government committees and advisory councils – a very necessary step. Thus, GFAA clubs and association members are more often becoming the contact point for government seeking advice and information, as well as contact points for lobbying on behalf of members.

Along the same lines, the GFAA offers game fishermen:

- Representation at national and international seminars on billfish and other pelagic species by all game fishing sectors.
- An active voice and contribution to ensure that recreational offshore fishermen have access to and an equitable share in fish and bait resources.
- The opportunity to take active executive positions in clubs, State associations and the national body, the GFAA.
- Advocacy to governments on issues affecting game fishers interests.
- The GFAA Executive strives to maintain affiliation fees at the minimum level necessary to give service and efficient operation.

The association's interests in science and conservation are clear cut and the association is regarded, rightly, as a world leader.

The game fish tag and release programs and tournament minimum weights are just two examples of leadership in ethical fishing and conservation.

In addition, the GFAA has a research foundation. The wisely allocated grants that have been made so far are already providing benefits to fish and fishermen.

The GFAA is your organisation. The support and membership you give will result in multiplying benefits for you, the angler.

Put simply ... **IF YOU GAME FISH, IT IS IN YOUR INTEREST TO BELONG TO A GFAA AFFILIATED CLUB.**

For the location of your nearest GFAA-affiliated club, consult the full GFAA club listing in this journal or visit www.gfaa.asn.au or email secretary@gfaa.asn.au

Code of Practice for a Responsible Gamefish Fishery

Codes of Practice are important to set standards for organisations and have been developed for a wide range of activities and industries, including the seafood industry. Many of the principles incorporated into Codes of Practice might seem obvious or general, but they clearly demonstrate to those inside and outside the organisation that high standards do exist and are strongly encouraged.

It is important that a Code of Practice for gamefishing in Australia be promoted, especially since some sectors of the public and the media are not well informed about this form of angling.

THE PRINCIPLES OF THE GFAA

To a large extent, the GFAA has operated under a form of 'Code of Practice' for many years. The constitution of the GFAA contains a set of objects (or aims) that are a very useful starting point in this regard. Taking the relevant points from the Objects of GFAA (the ones that relate to fishing ethics, conservation and so on), it is clear that the Association has set itself high standards. That is:

- To formulate and support fair, uniform and ethical angling rules.
 - To conserve gamefish and food fish resources for the recreational and economic use of present and future generations.
 - To affiliate with the International Game Fish Association (IGFA) and work closely with that Association as well as scientific institutions and government bodies interested in fisheries conservation and management.
 - To encourage and further the study of recreational angling, the related fish species and the habitat requirements of such species.
 - To develop and support fish tagging programs and other scientific data collection.
 - To act as a data accumulation centre for fishing results and to make such information available to governments and others for furthering education in the wise use and conservation of the species.
 - To analyse the pressure of recreational and commercial fishing upon the respective gamefish species.
 - To disseminate information and knowledge of scientific studies of commercial fishing and gamefishing to GFAA member clubs and to the general public.
 - To assist and participate in domestic and international gamefish seminars and symposiums where the expertise, data and purposes of the Association may be helpful in assisting other organisations with similar objectives.
 - To make grants to gamefish-oriented organisations or institutions for the support of research and education in the sciences related to gamefish and the sport of angling.
- Minimise taking onboard material that will produce pollution or rubbish. Observe proper provisioning processes. Minimise packaging.
 - Follow all relevant regulations by governing institutions. Adhere to bag and size limits. Respect and adhere to protected species legislation. Be aware of zoning within marine parks and marine protected areas.
 - Be informed about the biology of gamefish. For example, be aware of how to identify various gamefish species for more accurate recording of tagging and capture data.
 - Tag and release fish with care. Learn the correct procedures for tag and release and catch and release to ensure maximum likelihood of survival of tagged and released fish. Record and forward accurate post-release information in a timely manner.
 - Take only what is needed. Exercise restraint when taking any species of fish even if no bag limits exist. Be realistic about the amount of baitfish taken for fishing. Try to return unused live baitfish to the area in which they were caught.
 - Dispatch fish quickly and humanely. All fish that are taken should be killed as quickly and humanely as possible.
 - Convey the benefits of gamefishing to the public. Take opportunities to educate the non-fishing public about the benefits of gamefishing, of tag and release and support of research. Encourage others to join affiliated gamefishing clubs.
 - Cooperate and participate in research and development activities that will enhance the sustainability of the resource. Offer free access to fish for recognised research programs. Participate in biological sampling programs.
 - Participate and assist in the collection of catch and effort statistics.
 - Consider and respect the rights of others when engaged in any aspect of gamefishing. This includes other anglers, and commercial fishers' rights to harvest common property resources.

These objects are largely pursued through the rules and regulations of the Association. The GFAA Research & Development Foundation has also been formed to assist in funding the pursuit of many of these specific goals.

THE CODE

Principles of a Code of Practice for gamefishing in Australia (not only for members of clubs, it should be noted) include the following. Gamefish anglers will strive to:

- Fish to the ethical standards espoused by the GFAA. Follow the rules and regulations set by the GFAA. Always conduct gamefishing activities in an ethical manner.
 - Show due care and responsibility for the habitat of gamefish and other marine life. Don't discard anything overboard, including plastic, metal and fishing line. Report pollution. Pick up floating rubbish. Take care in anchoring over sensitive reef areas. Only use biodegradable chemicals onboard.
 - Minimise direct effects on wildlife, including seabirds, marine mammals and reptiles.
- Respect other FAD users at all times.
 - FADs are for the benefit and enjoyment of all recreational sectors.
 - Courtesy should be given to fishers who are already using the FAD.
 - FAD users should take turns in fishing the FAD and accommodate new arrivals.
 - All fishers should keep boats, lines and lures a safe distance from the FAD.
 - Do not use braid (Spiderwire) near the FADs. This line type causes cutting damage to the mooring line of the device. This will result in the FAD breaking free and the ground tackle being lost.
 - Do not tie your boat up to the FAD.
 - Report any damage to the FAD to the appropriate owner.
 - Comply with bag limits and only take what you need.

CODE OF CONDUCT FOR FISH AGGREGATING DEVICES (FADs)

What Marlin is that?

Black Marlin

Features distinguishing the three marlin species. Note that no single feature should be used in isolation, but rather, as many features as possible should be checked to confirm an identification (Table prepared by Dr Julian Pepperell; Illustrations courtesy Craig Smith Marine Art).

	Feature	Black Marlin	Blue Marlin	Striped Marlin
A	Pectoral Fins	Rigid. Cannot be folded along body (for fish over about 20kg). Curved like half sickle, aerofoil cross section. 	Can be folded along body. Straplike, flat cross section. 	Can be folded along body. Strap-like, often 'leaf' shaped. Flat cross section. 
B	First (Main) Dorsal Fin (when fully erect)	Lowest of all marlin; usually rounded tip. Height about half body depth. Rarely has spots. Stout (fin rays are relatively thick). In fish less than 50 kg, dorsal relatively high for much of its length.	Intermediate (but obviously high). Height about two thirds body depth (about to level of origin of pectoral fin). Pointed tip. Sometimes has numerous small spots. Stout (fin rays are relatively thick).	Highest of the marlins. Height equal to, or just less than, body depth. Trailing edge more gradual than other two marlin, often resulting in rounded tip and 'ragged' trailing edge. Relatively floppy (fin rays not stout).

Black Marlin

	Feature	Black Marlin	Blue Marlin	Striped Marlin
C	Second Dorsal & Second Anal Fins	Second dorsal fin anterior to (in front of) second anal fin (measure as shown in accompanying figure).	Second dorsal fin posterior to (behind) second anal fin.	Second dorsal fin posterior to (behind) second anal fin.
D	Pelvic , or Ventral Fins	Very short. Less than 15% of lower jaw-fork length.	Moderately long; 16 to 23% of lower jaw-fork length.	Long. 15 to 27% lower of jaw-fork length.
E	Lateral Line	Single. Obvious only in small (less than about 25kg) specimens.	Complex, but not visible. (If skin is cleaned and dried, lateral line shows as 'chicken-wire' shapes on back of skin).	Often visible as single line, especially in fish under about 80kg. Present in larger fish, but not always obvious.
F	Scales	Scales relatively deep, but can be clearly discerned.	Very obvious just under skin. Scales are nearly always exposed by skin breaking when handling.	Scales not obvious (deep in skin). Not easily exposed by superficial abrasion of skin.
G	Lower Jaw	Short & 'stocky' (Like chicken's beak). Often turned down at tip.	Short & 'stocky'.(Like chicken's beak). Sometimes with downward turn at tip.	Long and slender. Acutely pointed.
H	Length Ratios	Ratio of eye-fork:lower jaw-fork lengths ranges between 0.85 and 0.88. Similar to blue marlin.	Ratio of eye-fork:lower jaw-fork lengths ranges between 0.87 and 0.89. Does not overlap with striped marlin.	Ratio of eye-fork:lower jaw-fork lengths ranges between 0.82 and 0.86. Does not overlap with blue marlin.
I	Bill	Stoutest of three marlins. Large sharp denticles over surface - can cause abrasive injuries when handling.	More slender than black, stouter than striped. Large sharp denticles over surface - can cause abrasive injuries when handling.	Slenderest of the three marlins. Very small denticles over surface - unlikely to abrade skin when handling.

Blue Marlin

Striped Marlin

	Feature	Black Marlin	Blue Marlin	Striped Marlin
J	Body shape	Oval in cross section. Robust at level of pectoral fin, tapering gradually towards tail.	Oval in cross section. Heavier than striped marlin for any given body length (see graph).	Slab sided. Elliptical in cross section. Weight per body length least of the three marlins (see graph).
K	Maximum Size	Northern Qld: 650 kg; NSW: 350kg. Usual 'run' off southern Qld/NSW is 30 kg to 120kg. Specimens less than 20 kg not uncommon.	Eastern Australia: 370kg. Usual 'run' is 100 kg to 200kg. Specimens under 50kg very rare off east coast.	Eastern Australia: 190kg. Rare at this size. Usual 'run' off eastern Australia is 60 kg to 120kg. Uncommon under 40kg.
L	Flesh colour	Pinkish white/grey.	Pinkish white/grey.	Mostly a distinct orange colour (resembling smoked salmon).
M	Colour/ Vertical bars	May show bars when alive (esp. juveniles), but disappear after death. Dorsal fin usually a distinctive mauve/pink in life. Body colour tends to a dull grey after death.	Show vertical bars in life and after death. Body colour becomes steely grey to very dark blue after death. Dark colour over whole body, including head. Light blue eye colour stands out.	Vertical bars in life, and always visible after death. Whole body does not become dark after death. Belly usually retains creamy-white colour.

And how big is it?

Estimating the size and weight of your catch is one of the more refined skills of a gamefish angler. It's especially important when practising tag-and-release as many of the important statistics flowing from tagging programs are influenced by your size and weight estimates.

Graphs to help you more accurately determine weights of black, blue and striped marlin, sailfish, yellowfin and southern bluefin tuna and mako and tiger sharks. All graphs prepared by Dr Julian Pepperell derived from his own data collected over many years from inspection and measurements of large numbers of individuals of each species. Illustrations Craig Smith Marine Art.

Black Marlin

Blue Marlin Length/Weight Curve

Striped Marlin Length/Weight Curve

Sailfish Length/Weight Curve

All graphs depict average length-weight curves. It should be noted that there is considerable spread of weights for a given length around these average lines. The length of all billfish is measured from the tip of the lower jaw to the fork in the tail – the 'short length' used in record claims. In order to read these curves, draw a vertical line from the length of the fish to the curve, and from the intersection, draw a horizontal line to the weight axis.

Yellowfin (A) and Southern Bluefin (B) Tuna Length/Weight Curve

The graph on the left shows the length/weight curve for both yellowfin tuna and southern bluefin tuna since the curves are virtually identical for these species. To determine the approximate weight of tuna, measure from the tip of lower jaw to the fork in the tail, then draw a vertical line on the graph from the length of the fish to the curve, and from that intersection, draw a horizontal line to the weight axis.

How big is that mako or tiger shark?

Just as accurately estimating the size and weight of a billfish is important, so, too, is estimation of sharks' weights. To this end, Dr Julian Pepperell has compiled length-versus-weight graphs for the two most popularly targeted 'game' sharks, the mako and tiger.

Mako Shark Length/Weight Curve

This graph depicts the average curve for mako sharks in the more commonly caught size ranges. The length of the fish is measured from the tip of the nose to the fork in the tail - the length used in record claims.

Tiger Shark Length/Weight Curve

This graph delivers the same information for tiger sharks. Measure the shark from its nose to the fork in its tail (short length). To determine an approximate weight, draw a vertical line from the length of the fish to the curve, and from that intersection, draw a horizontal line to the weight axis.

Narrow Barred (Spanish) Mackerel Length/Weight Curve

Members of Mackay GFC have been collecting Spanish Mackerel samples (flesh & liver) over the past 2 years for a study being conducted by UTS into Ciguatera in Spanish Mackerel. As part of the sample collection process they have also been taking total length and weight measurements of all the fish .

This closely correlates to measurements of the species in WA over the past 20 years sampled.

Thanks to:

Peter Babarskas Life Member GFAA Recorder

GFAA APP

FOR ALL GFAA AFFILIATED ANGLERS

GFAA is pleased to announce the release of the Association's app for iOS and Android devices.

The app complements the new GFAA website at www.gfaa.asn.au

The app updates each time it comes within phone range and stores the data so it can be downloaded at sea.

Now you can view up-to-date capture and release records and data immediately.

Need to check angling rules or identify a marlin species? Now just a click away.

Please feel free to share this announcement with fellow anglers whether club members or not.

Download through the **Apple App Store** or  **Google Play Store** for Android devices. Just type in GFAA – not case-sensitive.

HISTORICAL SPECIAL FEATURE

THE NEW SOUTH WALES GAME FISHING ASSOCIATION INC. INTERCLUB TOURNAMENT

A HISTORY OF AUSTRALIA'S
LONGEST RUNNING GAME
FISHING EVENT BY JOHN MCINTYRE

“

It is really no wonder that this tournament has grown the way that it has, its seeds were planted in the prolific waters of Port Stephens where the sport of Australian game fishing began in 1913 and it has been annually nourished by the participation of many thousands of anglers all willing to compete, not for a valuable award but for the glory of their club, may it always be so.

”

This quotation by the late Geoffrey Woolley, President of the New South Wales Game Fishing Association, in 1998.

It has been a great ride- wonderful days, lousy days, balmy days, cyclones, storms, unruffled ocean surfaces, events completely cancelled, days cancelled due to sea conditions... the Interclub has had them all over the years that the tournament has been held. 2025 will, in fact, be the 63rd. event.

Through all this, anglers from all over have travelled to picturesque Port Stephens to sample the delights, frustrations and triumphs of competing in what became the premier game fishing competition on the Australian calendar.

The story of the foundation of the Interclub Competition is possibly not so well known by younger anglers but we will recap briefly. Anglers from Newcastle and Port Stephens and Sydney (represented by the NSW Rod Fishers Society) had engaged in friendly competition since before the outbreak of World War 2 in 1939, at which juncture all boat use and certainly game fishing, ceased for six long years.

In 1948, the Sydney and Port Stephens groups agreed to recommence their competition, an activity that ran casually for several years with varying successes. The event continued to be held until 1955 when it was placed on a more formal basis as an annual event held between Newcastle and Port Stephens Game Fish Club (N&PSGFC) and the new (formed in 1952) Sydney Game Fishing Club (SGFC).

Following expressions of interest from several other NSW clubs, the host clubs led by the incumbent Presidents, Richard Rowe DFC of Sydney (later President of GFAA- 1964-67) and Harry Danvers of Port Stephens, agreed to conduct an integrated competition in February 1962, in parallel with their contest, to enable the other NSW affiliated clubs to enjoy the competition at Port Stephens. This event, styled as "a Champion Club Competition", is recognised as the initial NSW Interclub Competition. For the following year, 1963, the combined clubs event became exclusively an "all- State" event, hosted by the New South Wales Game Fishing Association (NSWGFA).

From the outset, the Interclub was fostered as a "teams" event, with the principal trophy being the Interclub Shield. The Runner-Up trophy was a carved wooden spoon created by the former Sydney President Bill Southam for the previous Sydney versus Port Stephens events. The Champion Boat Trophy was, and is, much sought after and was donated by the then newly formed Broken Bay Game Fishing Club (BBGFC). For the first fourteen years, the contest was a capture only event as the concept of release did not gain support until the NSW State Fisheries tag and release programme was put in place.

The architects of the T&R movement were John O'Brien MBE, Dr Don Francois, Peter Goadby OAM and Dr Julian Pepperell, then NSW State Fisheries research scientist. It is appropriate

Top: Shoal Bay, Pt. Stephens, c. 1951
Lower: Weighing Station, Shoal Bay, C. 1960

to mention that the pioneer angler/author and joint founder of N&PSGFC, Athel D'Ombain, had conducted trials of gamefish tagging in 1939 in his local waters. His timing was unfortunate due to the outbreak of WW2 and, regrettably, a lack of interest by anglers.

The first Interclub to feature a T&R section was held in 1976 on which occasion the BBGFC vessel "La Fuzz", skippered by the well-known racing car driver Frank Match, won Champion Boat T&R. Dr Julian, the GFAA Scientific Adviser, has continued his long involvement at the Interclub ever since, and leads the teams of scientists who perform a variety of tasks including tag reporting, catch sampling, surveys, specific body studies and economic assessments at the event. Julian has kindly provided a survey of the scientific activities, and it is published elsewhere in this Journal. Our thanks to Dr Julian and his many helpers/colleagues for their work over many years.

At the commencement of the Interclub in the early 1960's, the vessels engaged in the event were typical of the era, cruisers or launches of timber construction, mainly with single engines (usually petrol) and almost exclusively slow, certainly by today's standards. The comparatively small number of twin-engine vessels were considered to be pretty "slick" and the presence of a flying bridge with top-side controls to be the latest in boat design. Boats longer than 35 feet (11 metres) were in the minority and trailer boats were exceptionally rare, probably due to the unreliability of the contemporary two-stroke outboard engine.

Over the past sixty plus years, boat design and construction has undergone several revolutions and this is reflected in the changes in competing vessels over this time. There has always been a strong desire by competing skippers to field the latest in technology and sea worthiness, and the performances of the modern game fishing boats reflects this. One of the first commercially produced fibre glass cruisers, a 24 ft Pongrass design powered by the then radical Volvo Penta stern drives had its debut during the 1964 Interclub. It was the forerunner of the now dominant method of construction. In 1967, a fibreglass 31 ft Bertram flying bridge cruiser imported from USA by Sydney's famous angler and TV star Bob Dyer, by then owned by Dr Frank Ritchie as "Overdraft", won the Interclub Champion Boat trophy, the first of the "new breed" to do so.

At the 1963 commencement of the Interclub, the facilities for vessels and for captured fish handling was quite primitive. All the activities were centred at Shoal Bay and the weighing station was located there. Boats traditionally moored in the Bay and many laid their own swing moorings or had local fishermen lay mooring blocks on a

rental basis. The Bay is subject to swells and on occasions vessels were known to drift off their moorings or to break free during particularly windy periods, making for dramatic days or even more exciting nights! Some vessels finished up on Shoal Bay beach or over at Winda Woppa, on the northern side of the Port. There was a desperate need for improved facilities, but these were slow coming and the Shoal Bay and Nelson Bay fleets almost all relied on swing moorings. Things gradually improved but it was not until the 1980's that operations such as Nelson Bay Marina, Anchorage Marina and Soldiers Point Marina finally provided boat owners with a level of safety and convenience that had been sorely needed. Today the facilities are top class and much sought after during the annual event.

Likewise, the arrangements for landing and weighing fish at the Interclub Tournament were poor. The weighing station, in its various versions, was located on the Shoal

Bay wharf which necessitated a hazardous mooring operation in any sort of swell or alternatively the transfer of fish and people via dinghy or barge. On several occasions, the wharf structure was so badly damaged by storms that the Port Stephens Council could not permit access prior to repairs or rebuilding. Invariably these occasions seemed to coincide with the then February- March timing of the Interclub. For a number of years in the early days, a pipe and beam structure to carry the weighing scales was erected on the beach front at the water line and there are numerous photographs in existence of marlin and sharks waiting weighing being washed around the legs of officials and participants, as swells tumbled on to the beach.

The eventual move to the Public Wharf at Nelson Bay was generally welcomed as it provided greater safety and convenience. In any event, the Shoal Bay wharf needed rebuilding. The move to Nelson Bay saw the long ties with Shoal Bay broken but it is now agreed that such a move had become inevitable, given the growth of the annual event and the need to handle vessels and catches safely and efficiently. The station at Nelson Bay is dedicated to Dr. Mark Lidwill, the pioneer angler who at Port Stephens, on or about February 8, 1913, landed the first marlin caught on regulation tackle in Australasia, which was also the first black marlin ever boated. A plaque noting his landmark capture is attached to the weighing structure.

The Interclub Tournament has always relied heavily on voluntary labour for the thousand and one jobs

Top left: Richard "Dick" Rowe's "Santiago", S.G.F.C, C. 1960. **Top right:** NSW Interclub Tournament - Day 1, 1963. 33 Marlin & 5 Sharks on weighing station erected on sand at Shoal Beach. associated with the conduct of such a big event. For all the years, stalwart members, particularly from N&PSGFC, but also from clubs all over and from NSWGFA, have provided the muscle and brain power to ensure that things run as smoothly as possible. Parallels have often been drawn with ducks serenely travelling along whilst frantic paddling underwater out of sight exists! Dedicated Association executives have spent immeasurable hours organising, cajoling, persuading and, at times, bullying to ensure that things fall into place. Certainly, things can and do go awry but the volunteers seem to see things through, and it should be acknowledged that many of these folk give up their own fishing opportunities, to help fellow game fishermen by labouring at the weighing station and beyond.

It is timely that we pause here to thank the "voices of the Tournament", particularly our friends and colleagues from the Lake Macquarie GFC (LMGFC), the Grieves family. The late Neil and Lyndy, and now their daughter Leanne Hoff, have provided a continuous coverage of the event for an approaching thirty years. The radio schedules over the years have provided reassurance, vital safety information and monitoring, tournament details and weather information on an unflinching basis, often into the early hours of the morning. Plenty of skippers have had reason to thank the dedicated radio operators for keeping watch on them during long fights and slow trips home, late at night.

And what about the Interclub competitors over the past years? The cast of players runs into the thousands and the events have seen them all- knights of the realm, powerful business and professional figures, war heroes, not a few near billionaires, "colourful" racing identities, sporting heroes, ordinary guys and gals, professional skippers and crews, a few folk down on their luck, people from all over, including overseas anglers and world renowned scientists. All these people were, and are, united by the thrill of the chase, the lure of the sea and the spirit of competition. Years of stories swirl around over several generations- great battles at sea, and on land; some characters whom we would rather forget; big evenings at the local hostellers; impromptu parties on someone's boat and so on. There are many stories that are certainly not fit to print in a family newspaper, even in today's free and easy journals.

Of course, at the end of it all the Interclub has been about the fish. And what fish there have been over the time. In the beginning, as they say elsewhere, there were small black marlin- at times in almost in plague proportions, not that anyone complained. For reasons not understood, in the 1950's, into the 1960's, there were annual east coast runs of quite small blacks and very few of the previously abundant striped marlin. Blue marlin were a vexed subject and some schools of thought insisted that blues did not exist off our coasts. Occasional fish were taken that did not fit the then conventional black/ striped descriptions and these were generally lumped together for some years into the GFAA record chart category as "Marlin- other", whatever that meant!

Certainly, the small blacks provided lively sport for Interclub competitors and led to the reduction in line sizes to provide point scoring challenges. As is well known, these small fish are sometimes quite dangerous on the leader at the boat and several anglers have had an unscheduled trip for medical attention, fortunately

Top left: 46 lbs - 21 kg. Short Bill Spearfish. Port Stephens NSW. C. 1965

Lower left: One of the first Short-billed Spearfish recorded at the NSW Interclub. Captured by Reg Lawrie of Broken Bay GFC from his "Neaptide" 1970 - weight 46 lbs.

none led to fatalities. One memorable incident during an early 1960's event was on board SGFC President Richard Rowe's twin engine cruiser "Santiago". A lively small black marlin was on the leader alongside the boat. As the crewman eased the fish on the port side, it suddenly leapt and tore through the canvas cockpit weather cover, bill first, landing on top of the engine box/ day lounge that had been vacated seconds earlier by Mrs Lesley Rowe. All in a flash of time- fortunately no injuries but a shocked owner's wife!

As the years rolled by, vessels became faster and able to travel well offshore in comfort and safety leading to the "discovery" of blue marlin off the N.S.W. coast- so they did exist! Striped marlin were now more prevalent and certainly in the recent decades, together with the blue marlin, became the most sought after species at the Tournament. Of course, there has always been a smattering of other less publicised billfish- short-billed spearfish, and sailfish to maintain interest. It is a matter of record, that the heaviest marlin weighed in the N.S.W. Interclub Tournament is Steve Norris' magnificent 340.5 kg (750 pounds) blue marlin caught during the 2002 event, from Graham McCloy's Lake Macquarie GFC vessel "Inkwazi".

Shark fishing has always been an important part of the Interclub Tournament and Port Stephens is justifiably famous for its big sharks. Mention the Port's whaler or bull sharks to seasoned anglers and you will get rolled eyes as they recall hand-to-hand combat with great 250 kg plus beasts, even on heavy tackle. Pulling up a big whaler from the depths, in the current, against those huge extended pectoral fins is enough to convert some anglers to trout fishing! But probably the most famous of the local sharks are the great oceanic tigers, a species renowned for its pugnacity and sheer size. Tigers over 400 kgs (say the old 1000 pounds) are not uncommon and it is interesting to recall the methods developed by local and visiting anglers to subdue these great fish on medium tackle, particularly 15 and 24 kg. Trying to "horse" up big tigers on heavy tackle is fraught with peril and can lead to a hernia. The experts play a much more subtle game and, in effect, trick the shark to come to the boat, with steady pressure and judicious boat handling. These tactics require a measure of courage as the activities alongside the boat can, of course, be hair raising given the sheer size of these creatures and their habit of rolling like a top on the leader!

So the Interclub has had them all during the past years- tigers, whalers, makos, big hammerheads, blue sharks and, of course, white sharks, now off the list but a prize worth pursuing in days gone by. In fact, the heaviest shark ever boated at the NSW Interclub Tournament was Broken Bay angler, the late Bob Woodcock's 785 kg (1727 pounds) white shark, taken from his vessel "La Fuzz" in the 1981 event. This fish was so big that it had to be slung and weighed horizontally at the Shoal Bay weighing station.

The surge in support for the Tag and Release concept at the Interclub

Top right: Mrs Katherine James of Lake Macquarie GFC with her 285 kg Mako Shark caught from "Gari-Lee" in 1981 Interclub. World & Australian record. **Lower right:** Heaviest shark ever weighed in Interclub Tournament. over the past forty plus years has been extraordinary. There is no doubt that this is due to recognition by modern day anglers that the environment is precious, and that greater understanding of the ocean's creatures is vital. The carefully compiled statistics indicate that over the past recent years that an average of 90% of billfish- marlin, spearfish and sailfish- have been tagged and released. Shark figures are lower, but still average more than 50%. All indications are that this trend will continue and grow.

For many years of the Interclub's running it was held over two successive weekends, the standard mantra was "last weekend in February- first weekend in March". In the past several years the climate, both financial and natural has changed, particularly during and after the Covid 19 pandemic. Following discussions with the Clubs, a new time frame has emerged: ie: the event held over one extended weekend only, Thursday for Ladies Day, competition fishing on Friday, Saturday and Sunday. Trophy presentation held at NSWGFA annual event later. This seems to have worked well so far and in no way has the competitive side lessened.

The more recent entry into tournaments of "cash" prizes for various species is a vexed subject. Dire predictions of the demise of the Interclub Tournament have shown to be greatly exaggerated- to misquote Mark Twain. It remains a "pure" competition in that it still fulfills the original goals, as quoted at the start of this article, with modest trophies marking team, boat and individual successes in a field of highly skilled and motivated saltwater anglers. The Interclub has fostered great fishing, enormous goodwill and has provided enduring friendships. Long may it do so.

Heaviest Marlin ever weighed in the event. Also Australian & NSW record on 60 kg tackle.

SCIENCE AND THE INTERCLUB

During the late 1980s, Dr Julian Pepperell attended the Interclub every year as a biologist with NSW Fisheries, taking measurements and biological samples from most of the landed fish. Upon setting up his own research company in 1991, this work continued, with travel costs being picked up by the NSW Game Fishing Association. Then, with the instigation of the NSW saltwater fishing licence in New South Wales, application was made for proper funding of this work. As well, funding was sought for another project, started in 1993, to monitor the catch and fishing effort at major NSW tournaments, including, of course the Interclub.

As a result, since the early 2000s, two monitoring programs at NSW tournaments have been powering along, thanks to ongoing funding from saltwater fishing licence fees, administered by the NSW Recreational Fishing Trusts. One of these programs, headed by Danielle Ghosn, routinely collects vital catch and effort statistics (numbers of fish captured or tagged per boat-day), while the other, operated by Julian since 2003, enables scientific sampling and research to be undertaken at major tournaments in New South Wales.

Each year, the Interclub and other major NSW tournaments are attended by Julian and/or trained marine science students and all fish brought to the weigh stations are routinely measured, sexed, and tissue samples taken and frozen. In addition to this routine monitoring and sampling, scientific researchers from around Australia and from overseas are invited to undertake studies utilizing the landed fish.

Regarding the Interclub, since the commencement of the funded program in 2003 to the 2024 tournament, scientific staff of Pepperell Research have attended every Interclub on all fishing days. During that period, a total of 617 fish have been measured, weighed, sexed and sampled. The total includes 284 billfish, 204 sharks and 129 other gamefish (mainly dolphinfish and yellowfin tuna). And every one of those landed fish has contributed to our knowledge of pelagic fishes.

Access to pelagic fish for research is difficult, so it is not surprising that scientists from many universities and research agencies from not just Australia, but also the US, UK, New Zealand, Taiwan and India have gratefully responded to ongoing invitations to attend the Interclub.

To date, the Interclub has hosted researchers and students from 14 Australian and 12 overseas Universities or Government Agencies, as well as scientific personnel from CSIRO, NSW Fisheries/DPI, the Australian Museum and the Sydney Institute of Marine Science.

Their work has involved 72 research projects including global genetics of many species, age and growth, parasite studies, sensory biology including vision, hearing, olfaction and lateral line function, reproduction, heavy metal and micro-plastic levels and dietary and feeding ecology including stable isotope studies.

Julian is especially proud that work at the Interclub and other tournaments has been an integral part of 21 Ph.Ds and 8 Honours or Masters studies, fostering a new generation of marine scientists who have gone on to make their mark in many areas of marine biology.

GAME FISHING ASSOCIATION OF AUSTRALIA

CONSERVATION OFFICER'S REPORT 2024

GFAA's ongoing commitment to conservation continued in 2024 with GFAA participating in several important meetings, committees, groups and forums to ensure game fishing voices are heard when decisions impacting our fishing experiences are being made. Since the last AGM GFAA has made submissions on a range of topics including:

- Draft Australian Government guidance for removal of oil and gas property and sea dumping of infrastructure in Commonwealth waters (Guidance).
- Proposed Otway Basin seismic survey
- Recommendation to remove SBT from threatened species list.
- Proposed Illawarra offshore wind energy area.
- Proposed Bass Strait offshore wind area.
- Proposed Indian Ocean offshore wind area.
- Proposed amendments to the Offshore Electricity Infrastructure Act.
- Senate Committee review of offshore wind consultation processors.
- ESSO Decommissioning campaign #1 - Gippsland Basin , Bass Strait, Victoria.
- Australia's Draft Sustainable Oceans Plan.

In September 2024, no doubt in part due to our submission TGS choose to withdraw their ill-conceived proposal to run seismic surveys for 400 days within a 31,500 km² area in the Otway Basin adjacent to Victoria and Tasmania. Hopefully the rest of our submissions can achieve similar good outcomes for fishers.

Fish Stocks

Regardless of what meetings are attended, submissions made or management decisions are made, there needs to be healthy abundant fish stocks to support our fishing so let's start with a look at the latest assessment of key Commonwealth fish stocks. The latest Fishery status reports covering more than 100 species across 22 Commonwealth fisheries show that 75 stocks were classified as not subject to overfishing, 6 were classified as subject to overfishing and 21 were classified as uncertain with regard to fishing mortality status. Most commercial effort in Commonwealth fisheries continues to occur adjacent to Victoria, Tasmania and New South Wales.

Although most Commonwealth stocks are classified as sustainable, concerns remain for striped marlin on the East and West coasts. At a state level, there remain concerns for pink snapper in several states, sand flathead in Tasmania, pearl perch along the central east coast, demersal fish in the West Coast, mulloway in NSW and SA, and a variety of Murray Darling freshwater species.

In more positive news this year the Minister for the Environment deleted southern bluefin tuna (SBT) from the Conservation Dependent listing category under the Environment Protection and Biodiversity Conservation Act 1999 (EPBC Act) as it no longer meets the eligible criteria for listing.

The latest stock assessment for SBT showed stocks have recovered from approximately 5% of the original spawning biomass in 2010 to approximately 23% in 2023. The recovery trajectory estimates a spawning stock biomass of 30% of unfished levels by 2035 meeting the reference levels outlined in the management plan for SBT.

Southern bluefin tuna has been listed as Conservation Dependent for more than a decade. During this time there has been a significant investment in science and our understanding of SBT stock structure has improved as have management arrangements. Recreational catches are now accounted for in the Southern Bluefin Tuna Management Plan and form part of the national catch allocations managed by the Australian Fisheries Management Authority.

Game fishers have also led a national campaign called Tuna Champions that has improved recreational stewardship and appreciation of SBT. The decision to delist SBT reflects what game fishers have been seeing on the water for years with growing

populations resulting in claims for records continuing to be submitted by anglers, and competitions focused on SBT going from strength to strength. In addition, recreational anglers have continued to collect valuable data and support dedicated science programs to assist with a better understanding of SBT stock structures.

Fish Welfare

One issue that has progressed since the last AGM is that of fish welfare. As stewards of our aquatic resources, game fishers respect and care for the welfare of each individual fish, whether it is destined to be kept or released. No one is concerned for the welfare of fish more than game fishers. Game fishers know that treating a fish with respect improves its chances of survival when released and dispatching fish quickly, and treating it right preserves the freshness of fish destined to be eaten.

The Game Fishing Association of Australia believes ethical treatment of fish is an important aspect of game fishing and we support fishing practices that have been proven to provide for fish welfare. GFAA has a code of practice based on ethical angling rules and supports and promotes practical means of handling, holding, releasing and humanely dispatching fish.

Fish welfare has been a hot topic this year with the

new Animal Care and Protection Bill in Victoria set to replace the current Prevention of Cruelty to Animals Act 1986 and the Commonwealth undertaking consultation on a review of the Australian Animal Welfare Strategy.

Despite assurances from the government that changes to animal welfare laws in Victoria would not impact fishing, the Victorian government failed to exempt fishing events from its draft Animal Care and Protection Bill. This oversight saw GFAA support the Game Fishing Association of Victoria and VRFish as they sought to hold the Victorian government to their original commitments that the new legislation would not impact our fishing. Through our collective efforts, most of our concerns were addressed.

Fish welfare has also been an issue at the national level with the Australian Government committing to revise the Australian Animal Welfare Strategy. This strategy is an agreement between the Australian Government, the State and Territory Governments, animal industries and animal welfare groups to harmonise legislation arrangements and policies concerning animal welfare. The Australian Animal Welfare Strategy lapsed in 2014 and the Australian Government has now committed \$5 million over 4 years to renew this strategy. Aquatic animals will be one of six focus areas for the updated strategy which is expected to be finalised by 2027.

GFAA acknowledges the significant stewardship role that falls to fishers as users of aquatic resources. We will do our part in guiding the development of this updated strategy, by participating in national fish welfare forums and supporting research and education designed to improve fish welfare outcomes. We will work to ensure the government understands the strong track record game fishers have in looking after the welfare of our fish stocks.

Fishing intensity of all Australian Government-managed fisheries, 2022

Offshore Wind Energy

During 2024 the Government's one-eyed fanatical pursuit of offshore wind energy has not changed. Since 2023 AGM, the government has declared areas suitable for offshore energy in the Southern Ocean, Illawarra and the Indian Ocean. This brings to five the total number of areas declared suitable for offshore energy developments after the Hunter Area was declared in 2023 and the Gippsland area in 2022. These five areas cover almost 23,000 km² of ocean including prime fishing grounds adjacent to Warrnambool, Wollongong, Bunbury, Newcastle and Gippsland. With a proposed area in the Bass Strait still awaiting a final declaration decision from the Minister for the Environment, prime fishing grounds in Northern Tasmania remain under threat.

Southern Ocean – Declared 6.03.24 (1,030 km²)
 Illawarra - declared 15.06.24 (1,022 km²)

Indian Ocean - declared 30.08.24 (3,9995 km²)
 Gippsland - declared 19.12.22 (15,000 km²)

Hunter - declared 12.06.23 (1,854 km²)
 Bass Strait - proposed area (10,136 km²)

To date, feasibility licenses have been issued for projects in the Southern Ocean and Gippsland declaration areas off Victoria. A preliminary decision has been made for feasibility licences in the Hunter region of NSW. There remains no evidence fishing values have been considered when issuing feasibility licences.

Southern Ocean - Declared 6.03.24 (1,030 km²)

Illawara - Declared 15.06.24 (1,022 km²)

Indian Ocean - Declared 30.08.24 (3,9995 km²)

Gippsland - Declared 19.12.22(15,000 km²)

Hunter - Declared 12.06.23 (1,854 km²)

Bass Strait- Proposed Area(10,136 km²)

GFAA has joined a sustained community effort to hold the government to account and while these efforts have resulted in reductions to the proposed areas (see below), the final zones will continue to be a threat while the government ignores calls to explain how fishing and offshore wind are supposed to co-exist.

To date the government has provided no assurance to the fishing community and the abysmal consultation process provided no confidence in the government's understanding or care about impacts to fishing. This point was made explicitly clear in our submissions on proposed areas as well as our submission to a senate enquiry into the offshore wind consultation process. GFAA continues to fight for science, and reason to be incorporated into the planning process and for fishers' concerns to be heard and addressed.

Marine Parks

Another thing that has not changed during 2024 is the relentless push for marine parks even though Australia already has marine parks around the country that cover 3.8 million km², or 43% of Australian waters. Despite the abundance of marine parks, the Western

Australian government is pursuing a new marine park covering more than 1,000 km² of coastline from Bremer Bay to the South Australian Border and the Commonwealth has drafted a management plan for a marine park in the Christmas and Cocos Islands covering 744,070 km².

In addition, the Australian government is continuing to review management plans for the South-east Marine Parks Network which includes 14 marine parks off the coast of Victoria, South Australia and Tasmania, covering 702,033 km². Once these plans have been reviewed the management plans for remaining marine park networks around Australia will also be subject to review. GFAA will be there to ensure these reviews are honest, transparent and based on science.

Shark Depredation

One constant that has not changed in the past year and remains a significant issue for game fishers is shark bite-offs. State governments across the country largely seem unwilling to acknowledge the problem let alone deal with it. One glimmer of hope is a Queensland project funded through the Fisheries Research and

Development Corporation looking at ways to reduce shark bite off. This project is currently underway, runs until 2026 and involves three phases:

Phase 1: Identification of potential solutions.

Phase 2: A series of stakeholder workshops with fishers, fishery managers, researchers, Indigenous representatives and other stakeholders in Queensland, Western Australia, Northern Territory and New South Wales.

Phase 3: If promising mitigation solutions are identified, trials will be considered in different states and under different fishing scenarios to assess their effectiveness.

Anyone interested in the project should email jonathan.mitchell@daf.qld.gov.au.

Research

While a research project on shark bite-off is welcome it is only one of several research projects related to game fishing that are needed. The Game Fishing Association of Australia and its members have a long and proud research history. Many significant research findings have been a direct result of GFAA research and GFAA members undertaking some form of citizen science. This is especially true for important recreational species not generally considered commercially viable.

GFAA has begun the process of designing our research program for the next few years and in 2024 launched a survey for GFAA members to inform this future research program. Feedback from our members is critical to ensuring our research efforts are focused on answering the questions our members want answered. This survey has three sections

Section 1 – About you – Where you fish and how you want to be involved?

Section 2 - Preferred research - The type of research you want GFAA to invest in?

Section 3 – Specific research questions - What do you want to know about your favorite species?

The results of this survey will be announced in 2025 and will inform our research plan. All those members who took the time to let us know what they wanted are sincerely thanked for supporting research about their favorite species.

2025 Outlook

Now while it is good to look back on GFAA conservation related activities over the last 12 months looking forward is the best way to help everyone's

Australia Sea Surface Temperature Outlook

fishing. 2025 is shaping up as a weak La Niña year with increased rain in the eastern part of Australia. La Niña refers to an altered state of the tropical Pacific, when cooler-than-average waters combine with changes in the overlying atmosphere to disrupt global weather patterns. For Australia, La Niña would increase the prospects of a wet spring and summer, and to a lesser degree, potentially subdue extreme summer heat. For fishers in Qld and Northern NSW it means you should take advantage of the days when you can go fishing as you may be in for another wet summer. That advice applies to all fishers - go fishing whenever you have the chance because fishing is great and people who fish have a higher wellbeing than people who don't.

In conclusion, it has been a busy year for GFAA and 2025 is shaping up to be just as busy. The need for GFAA as the national member-based peak body for game fishing in Australia has never been more important and I will continue to work to ensure our members can continue to enjoy the great game fishing Australia has to offer.

Australian International Billfish Tournament

brought to you by

Gold Coast
Game Fish Club

ANNUAL GFAA AWARDS & TROPHIES

Each year GFAA-administered trophies for Capture and Tag & Release are awarded to anglers fishing in Australian waters. The Capture trophies are the Tom Bell Trophy and the Peter Goadby Trophy. The Tag & Release trophies are the John O'Brien Trophy, the Sir Garrick Agnew Trophy, the Bob Lowe Trophy, the Peter Bennett Trophy, and the trophy for the Highest Point-scoring Boat, which was donated by Tailored Marine Accessories.

In 2003 anglers had three new trophies to fish for: the Geoffrey Woolley Trophy for the most meritorious tag & release achievement by an adult angler, the Grahame Williams trophy for the most sharks tagged by an angler, and the John and Anne Brooker Trophy for the most southern bluefin tuna tagged by an angler.

In 2004 another trophy was added: the Neil Patrick Trophy for the most other gamefish tagged by an angler.

In 2012 the David Litchfield Trophy was added for the highest point scoring boat tag & release marlin in Australian waters.

In 2015, the John Dunphy Young Achievers Award was included to recognise the huge support that the late John Dunphy gave to junior game fishing and GFAA.

The operative year for all trophies is from 1st July in one year to 30th June the following year. Entries for the Tom Bell Trophy, Peter Goadby Trophy, Bob Lowe Trophy, Peter Bennett Trophy and Geoffrey Woolley Trophy must

be submitted to GFAA by clubs through their State Association, and will be judged by the GFAA Executive. All other trophies are based on tag cards received by NSW Fisheries. To be eligible for the Peter Bennett Trophy the angler must be under 16 years of age at the time of the event.

It should be recognised that a claim need not be an Australian record to win the trophy. However, sufficient data must accompany the application to satisfy the Executive of its validity. The decision to award a trophy, or otherwise, rests totally with GFAA and no correspondence will be entered into.

There are also three trophies available at the Australian International Billfish Tournament, a prestigious tournament held every year from a different location: the Ern Palmer Trophy awarded to the winning team, the Moreton Bay Trophy awarded to the runner-up team (previously champion international team), and the Mal Ramsey Trophy awarded to the champion angler (previously champion Australian team).

Note: The use of the 'billfish only' tag is mandatory to be eligible to win any GFAA billfish trophies and awards.

EW PALMER TROPHY

From 1963-1975 awarded to the winning team at any All-Australian contest under the auspices of GFAA All-Australian competition. From 1981 awarded to the winning team(s) at the Australian International Billfish Tournament (AIBT).

- 1963** Tennessee II, Sydney GFC - Bob Dyer, Dolly Dyer, Basil Davidson (Sydney)
- 1965** JAC III, Sydney GFC - John Kellion, Peter Goadby, John McIntyre, Kevin Brennan (Sydney)
- 1967** Adriatic III, Port Hacking GFC - Frank Lipanovich, Fred Leate, John Davidson, Terry Healy (Sydney)
- 1969** Kestelle, Broken Bay GFC - Bob Oliver, Frank Pfeiffer, Ern Leslie, Eric Howarth (Port Hacking)

- 1971** Kakana, Sydney GFC - Neil Sutton, Bob Barstow, David Steele, C Barstow (Port Hacking)
- 1973** Georgina, Broken Bay GFC - Don Swavley, Jens Christensen, Phillip Swavley, Peter Swavley (Broken Bay)
- 1975** Kakana, Sydney GFC - Neil Sutton, David Steele, Bob Barstow (Broken Bay)
- 1981** Victoria 2 - Len Rowler, Joy Rowler, Bob Denham (Moreton Bay)
- 1982** South Queensland - Laurie Munroe, Pat Gay, Mal Ramsay (Moreton Bay)
- 1983** North Queensland - Jack Erskine, Tom Roche, Jim Dalling (Moreton Bay)
- 1984** South Australia - Ern Palmer, Bill Coombs, John Johnston (Moreton Bay)

- 1985** South Queensland - Bill Siganto, Arthur Trass, David Farley, John McPherson (Moreton Bay)
- 1987** North Queensland - Eddie Wong, Leigh O'Brien (Jnr), Damien Savis (Jnr), Tina McMillan (Jnr), (Townsville)
- 1988** Hong Kong - Bob McKernan, Alan Curtis, John Ridley (Townsville)
- 1989** St George Sportfishing Club - Al Hooper, Barry Yates, Roy Allen, Neil Sutton (Townsville)
- 1990** St George Sportfishing Club - Al Hooper, David Yiend, Roy Allen, Neil Sutton (Townsville)

ANNUAL JUNIOR TOURNAMENT REPORT: 2023-24

Prepared by Karen Wright, GFAA National Junior Tournament Coordinator

National and state winners

THIS YEAR HAS BEEN PARTICULARLY ACTIVE FOR MANY STATE JUNIOR COORDINATORS, WITH A SIGNIFICANT INCREASE IN THE VOLUME OF FISH RECORDED THROUGHOUT THE TOURNAMENT.

Entrants and Results

As the 2023-24 tournament year concluded, we recorded a total of 244 anglers, including 45 new entrants. Additionally, 42 junior anglers transitioned to senior angler status, leaving 220 active Junior and smallfry members as we enter the new tournament year.

In terms of catches, for the year:

- 472 fish tagged,
- 158 fish captured, and
- 388 fish measured and released (M&R).

Notably, there was a marked increase in tagged and captured fish, while M&R numbers declined compared to previous years.

STATE HIGHLIGHTS

QUEENSLAND

Queensland saw impressive achievements, particularly from the Sunshine Coast waters:

- **Claire Harris (Yorkeys Knob SC):** Measured and released 12 barramundi, with the largest at 84cm.
- **Nolan Reindl (Sunshine Coast GFC):** Tagged and released (T&R) 59 fish, including narrow-barred mackerel, black marlin, cobia, queenfish, and various tuna species. He also weighed three wahoo, with the best at 14kg on 8kg tackle.
- **Pierce Reindl:** T&R 13 fish, including narrow-barred mackerel and smaller Tuna species.
- **Joel Smith:** M&R four fish and weighed a 10.1kg wahoo on 8kg tackle.
- **Slater Boyett (Moreton Bay GFC):** M&R two snapper and T&R three fish (narrow-barred mackerel and mahi mahi).

NEW SOUTH WALES

New South Wales has seen a diverse range of fish species tagged along its coastline, with impressive efforts from anglers across the region.

- **Hunter Davies (Shellharbour GFC):** T&R seven striped marlin, one blue marlin, and one black marlin. his standout achievement was a 7.5-hour battle with a 174.5kg blue marlin on 15kg tackle, earning the highest point-scoring captured fish of the tournament year.
- **Logan Walker (Merimbula):** T&R an impressive 184 fish, including 142 Australian salmon, one hammerhead shark, and 12 skipjack tuna, along with various other small tuna species. Additionally, Logan also M&R 206 fish and captured 57, primarily Australian salmon, with some mahi mahi and other bread-and-butter species.
- **Maree Walker (Merimbula):** T&R 18 Australian salmon and M&R 48 fish, including Australian salmon, tailor, and flathead.
- **Harvey Korpar (Coffs Harbour):** T&R three fish, including a black marlin.
- **Indi Garvey (Port Macquarie GFC):** T&R one black marlin.
- **Taj Mossman (Central Coast GFC):** T&R one black marlin, four striped marlin, and one mahi mahi.

Merimbula has been the hub of NSW's tagging action, with small fry anglers Logan and Maree Walker making a significant impact. Across the state, anglers have shown dedication and skill, contributing to another outstanding year of fish tagging in New South Wales.

Nicolas Gilham - Latrobe Valley GFC

VICTORIA

Victoria's anglers have made significant contributions this year, with remarkable captures and tag-and-release efforts across various species.

- **Ruby Marland:** Set a state record by weighing a 20kg southern bluefin tuna (SBT) on 6kg tackle.
- **Troy Marland:** T&R a southern bluefin tuna and a gummy shark.
- **Ivy Marland:** T&R a southern bluefin tuna and a snapper.
- **Jacob Dance (Warrnambool Club):** Weighed a 92kg southern bluefin tuna on 37kg tackle.
- **Patrick Taranto (Bass Strait GFC):** In his debut year, T&R a broadbill swordfish—an impressive way to start his tournament journey.
- **Nicolas Gilham (Latrobe Valley GFC):** Weighed a 120.5kg southern bluefin tuna on 37kg tackle, along with several carp and snapper in Victorian waters. His standout achievement this year, however, has been targeting striped marlin in Bermagui, NSW, where he T&R 20 striped marlin, with the largest estimated at 120kg.

TASMANIA

Tasmania delivered strong results this year, particularly with southern bluefin tuna (SBT) and a variety of inshore species.

- **Darcy Robertson (Southern GC):** Captured four SBT, the largest weighing 22.4kg on 15kg tackle. He also T&R four more SBT and M&R numerous flathead, trout, and Australian salmon.
- **Grace Robertson:** M&R an impressive 132 fish, including flathead, salmon, trout, and perch.
- **Shanee Dance (Tuna Club of Tasmania):** T&R one SBT and M&R 21 bread and butter species, including flathead, parrotfish, and Australian salmon.
- **Konnah Smith (Tuna Club of Tasmania):** T&R three SBT.
- **Lucy Russell (Southern GC):** T&R two SBT and M&R 26 fish, including salmon, bream, and 10 brown trout. She also weighed in four fish, with her best SBT at 20.1kg on 10kg tackle and a 1.5kg brown trout on 1kg tackle—a fantastic achievement!

SOUTH AUSTRALIA

South Australian anglers impressed with their versatility:

- **Charlie Hodgens (GFC of South Australia):** T&R 18 fish, including 16 SBT an eagle ray and a gummy shark, as well as weighing a 12.7kg SBT on 10kg tackle.
- **Lily Whan (Port MacDonnell Offshore AC):** Captured two SBT, the best at 16.45kg on 10kg tackle.
- **Fred Marsh (Adelaide GFC):** M&R 5 carp

WESTERN AUSTRALIA

Western Australia continued its dominance in the tagging and capture scene, led by standout performances from anglers of King Bay GFC and Southern WA.

- **Max Grasso (King Bay GFC):** T&R 75 fish across various species and captured five, with his most impressive being a 4.22kg golden trevally on 1kg tackle.
- **Mia Grasso (King Bay GFC):** T&R Mia tagged 31 fish a large variety of species. Mia has also weighed 34 fish with her best being a hammerhead shark of 72.35kg on 6kg tackle.
- **Jessica Hornhardt (King Bay GFC):** Captured 18 fish in total of varying species on line classes 1,2,3 & 4 with the most meritorious being a golden trevally weighing 6.74kg on 1kg lineclass.
- **Lochlan Turrell (Southern WA):** M&R two snapper and a small southern bluefin tuna, while also T&R 11 fish, including five tiger sharks, one hammerhead shark, one whaler shark, one samson fish, and three black marlin. He also weighed in two samson fish (the best at 16.72kg on 15kg tackle), along with a southern bluefin tuna and a mullet of 11.83kg on 4kg tackle.
- **Jasmin Turrell (Southern WA):** M&R one snapper, contributing to the efforts of southern WA's anglers.

NORTHERN TERRITORY

The Northern Territory has seen strong activity this year, particularly in measure and release (M&R) efforts, with Darwin GFC leading the junior achievements.

- **Kaitlyn Collins (Darwin GFC):** M&R 14 barramundi, with the largest measuring 69cm. She also weighed in a 7kg barramundi on 4kg tackle and a 4.08kg threadfin salmon on 3kg tackle.
- **Lochlan Collins (Darwin GFC):** M&R five barramundi, with his best at 70cm, along with a tarpon and a threadfin salmon.
- **Lillie Collins (Darwin GFC):** Contributed to the family's success by M&R two barramundi (best at 54cm) and a snapper.
- **Luke Maclean (Darwin GFC):** M&R nine fish, including a queenfish, a blue salmon, a snapper, and five golden trevally.

This year has been one of remarkable achievements and enthusiasm, and we look forward to seeing what our junior anglers will accomplish in the next tournament year.

Karen Wright - GFAA National Junior Tournament Coordinator

SPONSORSHIP AND MONTHLY AWARDS

The continued support of sponsors, Shimano, TackleWorld, and Halco has been instrumental in rewarding our participants, with Monthly award winners receiving gift vouchers, reels, and a variety of fishing gear.

Special thanks to Australia Solid Fuel Testing for their financial support, which significantly contributed to tournament administration and sponsorship procurement. Furthermore, the tournament anticipates the valued support of Colorato Lures as a sponsor for 2025.

SHIMANO

ANNUAL AWARDS AND TROPHIES

Each year, the eight winners (Male and female categories - for Small Fry Release, Small Fry Capture, Junior Release and Junior Capture) from each State are awarded a State Champion award. The two Small Fry and two Junior overall National Champions will receive

an Australian Champion trophy. All perpetual trophies for the Junior National Tournament were donated by the late Mr Tom Roche, who was the tournament patron, and these trophies and awards are presented at the annual GFAA awards dinner.

Kids Fish 2

In 2024 the Kids Fish 2 program evolved with the responsibility of education shifting to club officials supported by the GFAA Kids Fish 2 team and particularly by sponsors. The style of events has been very broad from gala community days to specific club events. The primary objective of getting kids into fishing continues successfully. There are many club events planned for 2025.

Kids Fish 2 can lead to joining the free GFAA Junior Tournament and has in turn encouraged many juniors to sign up and receive various encouragement and achievement awards. This was witnessed at the GFAA Annual Awards Dinner where Juniors from all states attended to receive awards.

There has been great interest and good attendance at the Kids Chat sessions organised by John Marsh on occasional Sunday afternoons, gathering kids and quite a few parents to participate in Zoom video meetings. To date we've run

SHIMANO

GARMIN

The KF2 group continue to meet regularly and will continue the "Kids Chat" evenings held on Zoom.

Kids Fish 2

continued

five presentations from a (past) juniors team Q&A, Shimano, Halco, Tuna Champions and Al McGlashan with a repeat of Shimano and others to come soon. Videos will be posted on the website for future reference. The recordings are really worth watching if for no other reason than the fantastic questions the kids ask.

Inspirational events are shared through the Kids Fish 2 Facebook pages Australia-wide to stimulate and show clubs the benefits. We've now presented to close to 1000 kids over the past couple of years

To the people who make it all come together, thanks to all. 2025 will be another great year where dealing with kids and their club leaders is its own reward.

Clubs interested in working with the Kids Fish 2 group are invited to contact us at info@kidsfish2.com.au.

Visit the website at www.kidsfish2.com.au. Also on Facebook.

“

2024 Peppers Pizza Junior Fishing Classic

We managed to get double the entries that we had planned for and VFA and some others came onboard with giveaway products. This allowed us to ensure every entrant got a giveaway pack! It was a great event and has seen several new families and juniors join the club and boosted fishing in the local area enormously! Thanks again the GFAA for the support of the event!

We couldn't think of a better way for Junior fishos to spend the school holidays, and clearly, they all agreed!

A mammoth 94 Entrants!!!

We managed to ensure EVERY ENTRANT received a free tournament pack. A huge thanks to all the event sponsors, especially the GFAA Kids Fish 2 Program!!

PATCHES FOR TAG & RELEASE

GFM Tag & Release patches are available to anglers who qualify as follows:

- Tag & release of five fish of three separate species, including sharks.
- Tag & release of 10 fish of five separate species, including sharks.
- Tag & release of 15 fish of five separate species, including sharks.

To qualify for the awards, the angler must submit the following:

1. species of fish;
2. dates of tag & release;
3. serial numbers of tag and card submitted to NSW State Fisheries; and
4. cheque for \$11.00 (incl. GST) for issue of patch.

Applications for Tag & Release patches must be submitted through the angler's club. Note: no certificate will be issued.

PATCHES FOR BILLFISH TAG & RELEASE

GFAA Billfish Tag & Release patches are available to anglers who qualify as follows:

- Tag & release of five billfish.
- Tag & release of 10 billfish.

To qualify for the awards, the angler must submit the following:

1. Species of fish;
2. dates of tag & release;
3. serial numbers of tag and card submitted to NSW State Fisheries; and
4. A cheque for \$11.00 (incl. GST) for issue of patch.

Applications for Tag & Release patches must be submitted through the angler's club. Note: no certificate will be issued.

MERIT PINS FOR CAPTURE

Merit pins may be awarded to anglers for captures made in Australian waters and recorded in each of the various line classes according to the tables below.

GFAA shall design and control the issue of such Capture merit pins, which shall be engraved with the initials GFAA and be symbolic of the fish for which the award is made.

Club secretaries shall, by the authority of GFAA, order and distribute Capture merit pins to club members who have submitted to them a written application supported by relevant Capture and Weight Recording Certificates. State branches shall advise GFAA by 15th July each year of the number of each type of Capture merit pin so distributed.

GAMEFISH MERIT PINS

Line class kg	Bronze kg	Silver kg	Gold kg	Merit kg
1	2	3	4	8
2	4	6	8	16
3	6	9	12	24
4	8	12	16	32
6	12	18	24	48
8	16	23	32	64
10	20	30	40	80
15	30	45	60	120
24	48	72	96	192
37	90	135	250	500
60	ISO	210	325	650

SHARK MERIT PINS

Line class kg	Bronze kg	Silver kg	Gold kg	Merit kg
1	4	6	8	16
2	8	12	16	32
3	12	18	24	48
4	16	24	32	64
6	24	36	48	96
8	32	48	64	128
10	40	60	80	160
15	60	90	120	240
24	96	144	192	384
37	180	270	500	1000
60	30	420	650	1300

Only one Capture merit pin for each species and for each line class may be issued to any one angler during any single year ending 30th June.

It is recommended that Capture merit pins be presented at club annual general meetings, trophy presentation evenings or similar occasions.

The cost of the Capture merit pins shall be borne by the angler.

Note to club secretaries: to order Capture merit pins, contact Peter Papamanolis; M: 0423 517 785; E: highgatejewellery@gmail.com

CAPTURE MERIT AWARD 10 TO 1, 15 TO 1, 20 TO 1

A GFAA certificate is available for any recognised gamefish species. To qualify for the certificate the angler must submit the following:

1. An Australian Record Claim Form stating the club the claim is submitted for (eg 20 to 1); and
2. A cheque for \$27.50 (incl. GST) for the issue of the certificate

1000LB (454.4KG) CLUB

A GFM award is available for any recognised gamefish species. To qualify for the certificate the angler must submit the following:

1. An Australian Record Claim Form stating the claim is submitted for the 1000lb club
2. A cheque for \$ 110.00 (incl. GST) for the issue of the cap and certificate
3. Assistance Certificate(s) - awarded to boat crew members for assistance. A cheque for \$27.50 (incl. GST) per certificate -
4. Complete application form on page 45.
5. Boat Plaque will be engraved with the name of the boat, the skipper and fish details as given in the application. A cheque for \$50.00 (incl. GST) for the issue of the boat plaque - complete application form on page 45.

1000lb Club

As of 1st January, 2001, the 1000lb Club is open to overseas anglers at the cost of \$US100. Applications should be made in the same manner as Australian applicants. Also available are boat plaques and certificates for crew members who assist in the capture of a 1000lb Club fish. The certificates cost \$27.50 (incl. GST) each and the boat plaques are \$50 (incl. GST) each.

Note: For the 1000lb Club ONLY, fish may be weighed at sea. Of course, if the fish is a record claim, this does not apply.

1000lb Club boat plaque application and assistance certificate

I am submitting this application for: (tick those that apply)

- Assistance certificate(s)**
\$27.50 (incl. GST) per certificate
- Boat plaque**
\$50.00 (incl. GST)

The plaque will be engraved with the name of the boat, the skipper and the fish details as given in this application.

Note: Angler must complete a GFAA record application form to join 1000lb Club. This form should accompany the record application form.

Please print all names as they are to appear on the certificate.

Attach completed form to record application form and return it to the club secretary, who will forward it to the State Recorder.

Application for a certificate to be awarded to boat crew members for assistance

Rules and Equipment Regulations

The following Angling Rules and Regulations have been formulated to promote ethical and sportsmanlike angling practices, to establish uniform regulations for the compilation of Australian Gamefish Records and to provide basic angling guidelines for use in fishing tournaments and any other group angling activity.

The word 'angling' is defined as catching or attempting to catch fish with a rod, reel, line and hook as outlined in the GFAA Angling Rules and Equipment Regulations. However, there are some aspects of angling that cannot be controlled through rule-making. Angling rules cannot ensure an outstanding performance from each fish and Australian records cannot indicate the amount of difficulty in catching the fish.

Captures in which the fish has not fought or has not had a chance to fight do not reflect credit on the angler, and only the angler can properly evaluate the degree of achievement in establishing the record.

Only fish caught in accordance with GFAA Australian Angling Rules and within the intent of these rules will be considered for Australian records.

EQUIPMENT REGULATIONS

(a) Line

1. Monofilament, multifilament and lead core multifilament lines may be used. For line classes, see Australian Record Requirements.

2. Wire lines are prohibited.

(b) Line and backing

1. The use of backing is permissible.

2. The catch shall be classified under the breaking strength of the line directly preceding the double, leader, and hook. This section must be comprised of a single homogenous piece of line. (For record claims, 16m of the single line must be supplied).

(c) Double line

The use of a double line is not required. If one is used, it must meet the following specifications:

1. A double line must consist of the actual line used to catch the fish.

2. Double lines are measured from the start of the knot, braid, roll or splice making the double to the furthestmost end of the knot, splice, snap, swivel or other device used for securing the trace, leader, lure or hook to the double line.

Saltwater species: In all line classes up to and including 10kg (20lb) the double line shall be limited to 4.57m (15ft). The combined length of the double line and leader shall not exceed 6.1m (20ft). The double line on all classes of tackle over 10kg (20lb) shall be limited to 9.14m (30ft). The combined length of the double line and leader shall not exceed 12.19m (40ft).

Freshwater species: The double line on all classes of tackle shall not exceed 1.82m (6ft). The combined length of the double line and the leader shall not exceed 3.04m (10ft).

(d) Leader

The use of a leader is not required. If one is used, it must meet the following specifications:

1. The length of the leader is the overall length, including any lure, hook arrangement or other device, and is measured to the bend of the last hook. The leader must be connected to the line with a snap, knot, splice, swivel or other device. Holding devices are prohibited. There are no regulations regarding the material or strength of the leader.

Saltwater species: In all line classes up to and including 10kg (20lb) the leader shall be limited to 4.57m (15ft). The combined length of the double line and leader shall not exceed 6.1m (20ft). The leader on all classes of tackle over 10kg (20lb) shall be limited to 9.14m (30ft). The combined length of the double line and leader shall be limited to 12.19m (40ft).

Freshwater species: The leader on all classes of tackle shall be limited to 1.82m (6ft). The combined length of the double line and leader shall not exceed 3.04m (10ft).

(e) Rod

1. Rods must comply with sporting ethics and customs. Considerable latitude is allowed in the choice of rod, but rods giving the angler an unfair advantage will be disqualified. This rule is intended to eliminate the use of unconventional rods.

- The rod tip must be a minimum of 101.6cm (40in) in length. The rod butt cannot exceed 68.58cm (27in) in length. These measurements must be made from a point directly beneath the centre of the reel. A curved butt is measured in a straight line. (Above measurements do not apply to surf-casting rods.)

(f) Reel

- Reels must comply with sporting ethics and customs.
- Power-driven reels of any kind are prohibited. This includes motor, hydraulic or electrically driven reels and any device that gives the angler an unfair advantage.
- Ratchet handle reels are prohibited.
- Reels designed to be cranked with both hands at the same time are prohibited.

(g) Hooks for fishing with natural bait

- For live or deadbait fishing no more than two single hooks may be used. Both must be firmly imbedded in or securely attached to the bait. The eyes of the hooks must be no less than a hook's length (the length of the largest hook used) apart and no more than 45.72cm (18in) apart. The only exception is that the point of one hook may be passed through the eye of the other hook.
- The use of a dangling or swing hook is prohibited. Double and treble hooks are prohibited.
- A two-hook rig for bottom fishing is acceptable if it consists of two single hooks on separate leaders or drops. Both hooks must be imbedded in the respective baits and separated sufficiently so that a fish caught on one hook cannot be foul-hooked by the other.
- All record applications made for two-hook tackle must be accompanied by a photograph or sketch of the hook arrangement.
- A lure may be used in conjunction with a natural bait, provided the hook satisfies the requirements of hooks for fishing with natural baits (g) & the lure touches the bait during normal fishing/trolling practices. The hook must NOT precede the bait or bait/lure combo by more than the length of the hook.

(h) Hooks and lures

When using an artificial lure with a skirt or trailing material.:

- No more than two single hooks may be attached to the line, leader or trace. The hooks need not be attached separately. The eyes of the hook must be no less than an overall hook's length (overall length of the largest hook used) apart and no more than

Hooks for fishing with natural bait

LEGAL: if eyes of hooks are no more than 45.72cm (18 inches) apart.

NOT LEGAL: if eyes of hooks are more than 45.72cm (18 inches) apart.
LEGAL: if eyes of hooks are less than 45.72cm (18 inches) apart.

NOT LEGAL: if eyes are less than hook's length apart.

LEGAL: if eyes are no less than hook's length apart and no more than 45.72cm (18 inches) apart.

LEGAL: point of one hook may be passed through eye of other hook.

Note: hooks connected in this way are ganged hooks and not to be confused with gang hooks in Rule H2.

30.48cm (12in) apart. The only exception is that the point of one hook may be passed through the eye of the other hook. The trailing hook may not extend more than a hook's length beyond the skirt of the lure. A photograph or sketch showing the hook arrangement must accompany the record application.

Clarification: If a hook is cut, then the length of the hook will be deemed to be to the cut – anything beyond the cut will be deemed as leader. See Illustration 01.

- Gang (double or treble) hooks are permitted when attached to plugs and other artificial lures that are specifically designed for this use. Gang hooks must be free-swinging and shall be limited to a maximum of three hooks (either single, double or treble, or a combination of any three). Bait may not be used with gang hooks.
- Assist hooks or other such single hooks that are attached to

a lure with a lead constructed of monofilament, multifilament, wire or other such material must conform to the following: When using assist hooks on any artificial lure, **other than a skirted lure**, the lead cannot be more than 1 1/2 hook's length and the bend of the hook must not be more than 4 inches (101mm), whichever is less from the closest point of attachment on the lure. **Double and treble hooks may not be used as assist hooks.** See Illustration 02.

A photograph or sketch of the plug or lure must be submitted with record applications.

A gang hook in the intent of this rule is a hook with two or more prongs (ie: multi-pointed hook, not to be confused with ganged hooks as per diagram in Rule G1).

Hooks and lures

Illustration 02

- Not legal, the connection length is longer than 1.5 times the length of the hook
- Not legal, the overall length exceeds 101mm.
- Legal, the connection is less than 1.5 times the length of the hook.
- Legal, the overall length is less than 101mm from the lure.

Hard head soft body lures

Illustration 01

When submitting a drawing or photograph of a lure, the above information is required.

Gang hooks

LEGAL: if eyes are no less than hook's length apart and no more than 30.48cm (12 inches) apart.

LEGAL: point of one hook may be passed through eye of other hook.

NOT LEGAL: if eyes are less than hook's length apart.

NOT LEGAL: if eyes of hooks are more than 30.48cm (12 inches) apart.
LEGAL: if eyes of hooks are less than 30.48cm (12 inches) apart.

Gaffs and tail ropes

(i) Other equipment

1. Fighting chairs may not have any mechanical propelled devices that aid the angler in fighting a fish.
2. Gimbals must be free-swinging, which includes gimbals that swing in a vertical plane only. Any gimbal that allows the angler to reduce strain or to rest while fighting the fish is prohibited.
3. Gaffs and nets used to boat or land a fish must not exceed 2.44m (8ft) in overall length. (When fishing from a bridge, pier, or other high platform or structure, this length limitation does not apply.) In using a flying or detachable gaff, the rope may not exceed 9.14m (30ft). The gaff rope must be measured from the point where the rope is secured to the detachable head to the other end. Only the effective length will be considered. If a fixed head gaff is used, the same limitation shall apply and the gaff rope shall be measured from the same location on the gaff hook. Only a single hook is permitted on any gaff. Harpoon or lance attachments are prohibited. Tail ropes are limited to 9.14m (30ft).
4. Floats are prohibited with the exception of any small flotation device attached to the line or leader for the sole purpose of regulating the depth of the bait. The flotation device must not in any way hamper the fighting ability of the fish.
5. Entangling devices (either with or without a hook) are prohibited and may not be used for any purpose, including baiting, hooking, fighting, or landing the fish.
6. Outriggers, downriggers and kites are permitted provided that the actual fishing line is attached to the snap or other release device, either directly or with some other material. The leader or double line may not be connected to the release mechanism, either directly or with the use of connecting device.
7. Any devices used in conjunction with a lure that could impede the fighting ability of the fish MUST be on a breakaway system.
8. A safety line may be attached to the rod, reel or harness provided that it does not in any way assist the angler in fighting the fish.

ANGLING RULES

1. From the time a fish strikes or takes a bait or lure, the angler must hook, fight and land or boat the fish without the aid of any other person, except as provided for in these regulations. (CLARIFICATION to ANGLING RULE 1: *If the mate is letting out a bait or lure and the reel is in free-spool, the rod can be put back in the covering board. This situation is legal. Under NO circumstances can any drag be put on the reel or the rod handed to another person. The rationale is that the hook has not been set with the reel out of gear. However, when retrieving a bait or lure, the fish would be disqualified immediately if the rod is put back into the covering board or transferred to another person as the reel is in gear and the hook has been set.*)
2. If a rodholder is used and a fish takes the bait or lure, the angler must remove the rod from the holder as quickly as possible.

3. In the event of a multiple strike on separate lines being fished by a single angler, only the first fish fought will be considered for an Australian record
4. If a double line is used, the intent of the regulations is that the fish is to be fought on the single line for most of the time that it takes to land the fish.
5. The harness may be replaced or adjusted by a person other than the angler.
6. Use of a rod belt or waist gimbal is permitted.
7. When angling from a boat, once the leader is brought within the grasp of the mate, or the end of the leader is wound to the rod tip, more than one person is permitted to hold the leader.
8. One or more gaffers may be used in addition to persons holding the leader. The gaff handle must be in hand when the fish is gaffed.
9. The Angling Rules and Equipment Regulations shall apply until a fish is weighed.

THE FOLLOWING ACTS WILL DISQUALIFY A CATCH:

1. Failure to comply with equipment or angling regulations.
2. The act of a person other than the angler intentionally touching any part of the rod, reel or line (including the double line), either bodily or with any device during the playing of the fish, or in giving any aid other than that allowed in the rules and regulations. If any obstacle to the passage of the line through the rod guides has to be removed from the line, then the obstacle (whether berley, floatline, rubber band or other material) shall be held and cut free. Under no circumstances should the line be held or touched by anyone other than the angler during this process.
3. Resting the rod in a rodholder, on the gunwale of the boat or any other object while playing the fish.
4. Handlining or using a handline or rope attached in any manner to the angler's line or leader for the purpose of holding or lifting the fish.
5. Shooting, harpooning or lancing any fish (including sharks) at any stage of the catch.
6. Berleying with or using as bait the flesh, blood, skin or any other part of mammals other than hair or pork rind used in lures designed for trolling or casting.
7. Using a boat or device to beach or drive a fish into shallow water in order to deprive the fish of its normal ability to swim.
8. Changing the rod or reel while the fish is being played.
9. Splicing, removing or adding to the line while the fish is being played.
10. Intentionally foul-hooking a fish.
11. Catching a fish in a manner that the double line never leaves the rod tip.
12. Using a size or kind of bait that is illegal to possess.
13. Attaching the angler's line or leader to part of the boat or other

- object for the purpose of holding or lifting the fish.
- If a fish escapes before gaffing or netting and is recaptured by any method other than as outlined in the angling rules.
 - The act of any person touching any part of the leader when striking or hooking a fish.
 - Holding or touching an angler in a manner that assists them in fighting the fish or takes pressure off the angler. Touching or briefly holding the angler to prevent them from falling does not constitute a disqualification.

THE FOLLOWING SITUATIONS WILL DISQUALIFY A CATCH:

- When a rod breaks (while the fish is being played) in a manner that reduces the length of the tip below minimum dimensions or severely impairs its angling characteristics.
- Mutilation to the fish, prior to landing or boating the catch, caused by sharks, other fish, mammals or propellers that remove or penetrate the flesh. (Injuries caused by leader or line, scratches, old healed scars or regeneration deformities are not considered to be disqualifying injuries.) Any mutilation of the fish must be shown in a photograph and fully explained in a separate report accompanying the record application.
- When a fish is hooked or entangled on more than one line

GUIDELINES FOR TAG & RELEASE

- All GFAA Angling Rules and Equipment Regulations apply until the fish is tagged.
- Tagpoles must not exceed 4.57m (15ft) overall length.
- The tagpole or holding device must be in the hand when the fish is tagged.
- One or more persons, in addition to the person holding the leader, may tag or assist in tagging the fish.
- The tag needle must not protrude more than 50mm from the end of the tagpole or tag holding device, nor shall it exceed 5mm in diameter.
- Billfish only tag: The tag needle must protrude a min of 45mm and no more than 76mm from the end of the tag pole or holding device, nor shall it exceed 6mm in diameter.
- A fish is considered tagged and released when the tag is secured to the fish and released alive.

RULES FOR TAG & RELEASE AND MEASURE & RELEASE

- (a) No tournament shall be approved by a State Association that awards points for free release for GFAA tag species. No Tag & Release points shall be awarded in State Association-approved tournaments unless GFAA-approved tags are used
- (b) Measure & Release is allowed for species that have been determined by the GFAA from time to time – see section titled GFAA eligible gamefish for Measure & Release and section Guidelines for Measure & Release.

Note: (i) All GFAA Angling & Equipment regulations shall apply.

(ii) All applicable Tag & Release rules shall apply – ie items 1, 2 & 3 of the acts that disqualify a Tag & Release.

(iii) No fish can be released after measurement unless it is in a healthy and vigorous state.

(iv) The GFAA Measure & Release card is to be used to record species release information.

- All billfish MUST be tagged with the NSW DPI "Billfish only tag". This is the only tag that will be recognised for billfish in any tournament, competition, point scoring or trophies. Plastic tags are to be only used for pelagic and other species as listed. Steel tags are to be only used for sharks and rays.

THE FOLLOWING ACTS WILL DISQUALIFY A TAG & RELEASE:

- Failure to comply with GFAA angling rules and equipment regulations or tournament tag and release rules.
- Failure to comply with all other regulations that disqualify a capture.
- Use of a gaff (other than a jaw release device for the purpose of tagging, e.g. Boga-grips).

GFAA ELIGIBLE GAMEFISH FOR MEASURE & RELEASE

Albacore; Amberjack; Barramundi; Bass – Australian; Black jewfish; Bonefish; Bonito; Catfish – freshwater; Chinaman; Cobia; Kingfish – yellowtail (under 70cm); Mackerel – broad barred, narrow barred, shark and spotted; Mahi mahi; Mangrove jack; Mulloway (under 60cm); Perch – English, estuary, golden and silver; Queenfish (under 60cm); Rainbow runner; Salmon – Australian (under 40cm), Atlantic; threadfin; Samson fish; Saratoga; Snapper (under 40cm); Spangled emperor; Tailor; Tench; Trevally – big eye, giant, gold spot, golden and silver (under 60cm); Trout – rainbow, brook and brown; Tuna – bigeye, bluefin, kawa kawa, longtail, skipjack, southern bluefin and yellowfin (all under 60cm).

Note: Any species that is larger than the sizes noted above will not count in any Measure & Release competition as they are eligible to be tagged or captured.

GUIDELINES FOR MEASURE & RELEASE

- Only gamefish species as listed for Measure & Release are to be considered by this guideline.
- All GFAA Angling Rules & Equipment Regulation & Codes of Practice to apply until fish is caught, measured and released in a healthy and vigorous state.
- The use of knotless, rubber-coated nets or similarly designed nets that minimise slime and scale removal are to be used – the use of gaffs (other than release/jaw gaff) is prohibited.
- The fish is to be measured using an approved or recognised measuring mat. Measurements between centimetre increments shall be measured at the lower of the two increments; ie 46cm will be recorded as 45cm.
- Once measured, the fish is to be returned to the water as quickly as possible, and supported until it is able to swim away in a healthy and vigorous state. If the fish dies during this process, it is the skipper and angler's responsibility to disqualify the catch.
- All measurements and data must be recorded on an approved GFAA Measure & Release card that is to be returned to the angler's club for processing.
- Fish caught and released under these guidelines may be eligible for club or state points. (Check with your club or state for this.)

Rules for all tackle length records

GENERAL INFORMATION

All fish entered for length records must be measured by anglers at the site of the capture and released so that it swims away on their own and in good condition. Fish should be revived by moving it forward in the water to ensure a healthy release.

Fish caught and entered for length records are NOT eligible for weighing and submission for other record categories.

RULES AND EQUIPMENT REGULATION

All GFAA rules and equipment regulations stipulated for fishing with conventional and fly tackle in fresh and saltwater shall apply with the exceptions below. All angling and equipment regulations shall apply until the fish is measured and released alive in a healthy and vigorous state.

(a) Gaffs and nets

1. The use of gaffs to land fish is prohibited.
2. Nets used to boat or land a fish must not exceed 2.44 metres (8 feet) in overall length (when fishing from a bridge, pier or other high, stationary structure, this length limitation does not apply).
3. The use of knotless, rubber-coated nets or other similarly-designed nets that minimise slime and scale removal is strongly recommended.

(b) Measuring device

1. All fish must be measured using an official GFAA/IGFA measuring device. (IGFA, NSW DPI or Shimano mats).
2. The measuring device mat may be shortened by cutting it, but it may not be rejoined after it has been shortened

ANGLING REGULATIONS

The following acts will disqualify a catch:

1. Failure to comply with GFAA equipment or angling rules.
2. If the fish dies during the documentation process or does not swim away on its own accord after release.

LENGTH RECORD REQUIREMENTS

All fish entered for length records are subject to the same requirements stipulated for other record categories with the following additions and exceptions.

(a) Measuring requirements

1. Fish must be measured using an official GFAA/IGFA measuring device on a flat surface.
2. The fish's snout must be touching the nose-stop and be free of lures or lifting devices.
3. With the fish lying on top of the measuring device, measurements will be taken from the most forward part of the fish's snout to the rear centre edge of the tail.
4. All measurements will be made in centimetres.
5. Fish that measure between centimetre increments shall be recorded at the lower of the two increments. For example, a fish that measures between 45 and 46 centimetres will have a recorded length of 45 centimetres.

(b) Minimum length requirements for vacant records

Fish entered for vacant record categories must measure within the top-half of that species' maximum recorded length, as shown in the eligible species list.

(c) Minimum length requirements needed to defeat or tie existing records

1. To defeat an existing record, the fish must measure at least two (2) centimetres longer than the existing record.
2. A catch that matches the length of an existing record or exceeds the length by less than two (2) centimetres will be considered a tie. In the case of a tie claim involving more than two catches, length must be compared with the original record (first fish to be caught). Nothing measuring less than the original record (first fish to be caught) will be considered.

(d) Photographic requirements

Photographs included with applications must contain the following information:

1. The full length of the fish on the measuring device clearly showing the position of the mouth and tail. The fish may be held in position, but this must be done in a manner that does not obscure the view of the fish on the device.
2. A close-up showing the position of the fish's nose and tail on the measuring device.
3. The angler with the fish.
4. The rod and reel used to make the catch.

GENERAL BEST-HANDLING PRACTICES

To remove your fish from the water to document it for record purposes, anglers should use either hands or a knotless, rubberised landing net to minimise slime and scale loss. Lip-gripping devices may be used to help subdue fish; however, fish should not be hoisted vertically out of the water as this can cause damage to the jaw muscle and bone as well as to internal organs. The best method for removing fish from the water by hand is to support the fish's underside. Again, the point is always to hold fish horizontally and not vertically. Ensure that the measuring device and surface the fish is placed on is kept wet.

GFAA records require pictures and measurements of the catch. All of this takes time, so you should have the necessary equipment ready before landing the fish.

If the documentation process takes longer than several minutes, periodically place the fish back in the water or place in a livewell to allow it to breathe.

RELEASING

Considerable time and care should be exercised when releasing fish. Fish should be placed in the water and held by the base of the tail. If the fish does not swim away from your grasp on its own, gently move it forward in the water to get water flowing over the gills. For best results, move the fish in the forward direction only instead of back and forth. A fish's gills somewhat resemble the pages of a book and are designed for water flow in only one direction. Moving the fish in a slow circle or gently towing it behind the boat will accomplish this. Demersal species caught in waters deeper than 10 metres must be released by the use of a release weight.

Rules for flyfishing

EQUIPMENT REGULATIONS

(a) Line

Any type of fly line and backing may be used. The breaking strength of the fly line and backing are not restricted.

(b) Leader

Leaders must conform to generally accepted fishing customs.

The leader includes a class tippet and, optionally, a shock tippet. A butt or taper section between the fly line and the class tippet shall also be considered part of the leader, and there are no limits on its length, material, or strength.

The class tippet must be made of non-metallic material and either attached directly to the fly or to the shock tippet, if one is used. The class tippet must be at least 38.10cm (15in) long (measured inside connecting knots). With respect to knotless, tapered leaders, the terminal 38.10cm (15in) will also determine tippet class. There are no maximum length limitations. The breaking strength determines the class of the tippet.

A shock tippet, not to exceed 30.48cm (12in) in length, may be added to the class tippet and tied to the lure. It can be made of any type of material, and there is no limit on its breaking strength. The shock tippet is measured from the eye of the hook to the single strand of class tippet and includes any knots used to connect the shock tippet to the class tippet.

In the case of the tandem hook fly, the shock tippet shall be measured from the eye of the leading hook.

(c) Rod

Regardless of material or number of sections, rods must conform to generally accepted flyfishing customs and practices.

A rod shall not measure less than 1.82m (6ft) in overall length. Any rod that gives the angler an unsporting advantage will be disqualified. Extension butts are limited to 15.24cm (6in).

(d) Reel

The reel must be designed expressly for flyfishing. There are no restrictions on gear ratio or type of drag employed, except where the angler would gain an unfair advantage. Electric or electronically operated reels are prohibited.

(e) Hooks

A conventional fly may be dressed on a single hook or double hook or two single hooks in tandem. The second hook in any tandem fly must not exceed beyond the wing material. The eyes of the hooks shall be no farther than 15.24cm (6in) apart. Treble hooks are prohibited.

(f) Lures

The lure must be a recognised type of artificial fly, which includes streamer, bucktail, tube fly, wet fly, dry fly, nymph, popper and bug. The use of any other type of lure or natural or preserved bait, either singularly or attached to the fly, is expressly prohibited.

The fact that a lure can be cast with a fly rod is not evidence in itself that it fits the definition of a fly. The use of any lure designed to entangle or foul-hook a fish is prohibited.

No scent, either natural or artificial, is allowed on flies. The use of scented material in a fly is prohibited.

(g) Gaffs and nets

Gaffs and nets used to boat or land a fish must not exceed 2.44m (8ft) in overall length. (When fishing from a bridge, pier or other high stationary structure, this length limitation does not apply.)

The use of a flying gaff is not permitted. Only a single hook is permitted on any gaff. Harpoon or lance attachments are prohibited.

A rope or any extension cannot be attached to the gaff.

(h) 15kg category rules

1. 15kg tippet is for billfish and sharks only.
2. Shock tippet length is not to exceed 100cm (1m).
3. A minimum 500cm (5m) of fly line must be used.

4. Flying gaffs are permitted for this line class only.
5. All other GFAA rules and regulations for flyfishing apply.

ANGLING RULES

1. The angler must cast, hook, fight and bring the fish to gaff or net unaided by any other person. No other person may touch any part of the tackle during the playing of the fish or give aid other than taking the leader for gaffing or netting purposes.
2. Casting and retrieving must be carried out in accordance with normal customs and generally accepted practices. The major criterion in casting is that the weight of the line must carry the lure, rather than the weight of the lure carrying the line. Trolling a lure behind a moving watercraft is not permitted. The craft must be completely out of gear both at the time the fly is presented to the fish and during the retrieve. The maximum amount of line that can be stripped off the reel is 36.57m (120ft) from the lure.
3. Once a fish is hooked, the tackle may not be altered in any way, with the exception of adding an extension butt.
4. Fish must be hooked on the lure in use. If a small fish takes the lure and a larger fish swallows the smaller fish, the catch will be disallowed.
5. One or more people may assist in gaffing or netting the fish.
6. The Angling and Equipment Regulations shall apply until the fish is weighed.

THE FOLLOWING ACTS WILL DISQUALIFY A CATCH:

1. Failure to comply with Equipment or Angling Regulations.
2. The act of persons other than the angler touching any part of the rod, reel or line, either bodily or with any device, during the playing of the fish, or in giving any aid other than that allowed in the rules and regulations. If an obstacle to the passage of the line through the rod guides has to be removed from the line, then the obstacle shall be held and cut free. Under no circumstances should the line be held or touched by anyone other than the angler during this process.
3. Resting the rod on any part of the boat, or on any other object, while playing the fish.
4. Handlining or using handline or rope attached in any manner to the angler's line or leader for the purposes of holding or lifting the fish.
5. Intentionally foul-hooking or snagging a fish.
6. Shooting, harpooning or lancing any fish (including sharks) at any stage of the catch.
7. Berleying with flesh, blood, skin or any part of mammals.
8. Using a boat or device to beach or drive a fish into shallow water in order to deprive the fish of its normal ability to swim.
9. Attaching the angler's line or leader to part of a boat or other object for the purpose of holding or lifting the fish.
10. If a fish escapes before gaffing or netting and is recaptured by any method other than as outlined in the angling rules.

THE FOLLOWING SITUATIONS WILL DISQUALIFY A CATCH:

1. When a rod breaks (while the fish is being played) in a manner that reduces its length below minimum dimensions or severely impairs its angling characteristics.
2. When a fish is hooked or entangled on more than one line.
3. Mutilation to the fish, prior to landing or boating the catch, caused by sharks, other fish, mammals or propellers that remove or penetrate the flesh. (Injuries caused by leader or line, scratches, old healed scars or regeneration deformities are not considered to be disqualifying injuries.) Any mutilation of the fish must be shown in a photograph and fully explained in a separate report accompanying the record application.

Australian record requirements

Gamefish captures can only be considered for Game Fishing Association of Australia (GFAA) record status if they are caught according to GFAA Rules. Following is the information and procedures for filing claims. A fee of \$20.00 (incl. GST) is required for filing an Australian record application. **All materials submitted become the property of GFAA.**

Australian record categories

GENERAL INFORMATION

1. GFAA maintains Australian records for both freshwater and saltwater gamefishes in Line Class, Tippet Class and All Tackle categories.
2. To qualify for official recording and granting of GFAA records, gamefish, rays and sharks must be caught by a financial or life member of a club affiliated with a state branch of GFAA. In order to qualify for a vacant GFAA record a fish must be at least equal in weight to the line or tippet class in which the record is claimed. For a fish to replace an existing record it must outweigh the current record by an amount as shown in the section 'Weight Required to Defeat or Tie an Existing Record' under Regulations Governing Record Catches.
3. No application will be accepted for fish caught in hatchery waters, sanctuaries or banned fishing areas in national parks. The catch must not be at variance with any laws or regulations governing the species or the waters in which it was caught.
4. GFAA will not accept any record application generated from within a non-sanctioned tournament other than an internal club competition.
5. When an additional species of gamefish is made eligible for GFAA records, the effective date will be announced. Fishes caught on or after this date will be eligible for records. An announcement of additional species will be made in the Australian Game Fishing Records and Rules or by notification to State Association Secretaries.
6. **Men:** male persons who have attained the age of 16 years and over.
Women: female persons who have attained the age of 16 years and over.
Juniors: male and female persons who have attained the age of 11 years but not yet attained the age of 16 years.
Small Fry: male and female persons who have not yet attained the age of 11 years.

CATEGORIES

Records may be claimed in the following categories and subcategories.

1. All records in Saltwater, Freshwater, Saltwater Fly and Land-based Saltwater may only be claimed within their age and gender categories – with the exception of All-Tackle records.
2. For each species and line class, a new category for Overall record will be created effective 7 October 2017. The Overall record must exceed all existing records for that species and line class to be eligible.

LINE CLASS CATEGORIES

Line Class records are maintained according to wet testing strength of line used by the angler. (See 'Appendix A' for testing standards.) Records are kept in the following line class categories: 1kg, 2kg, 3kg, 4kg, 6kg, 8kg, 10kg, 15kg, 24kg, 37kg and 60kg.

ALL TACKLE RECORDS

All Tackle records are for the heaviest capture of each GFAA-recognised gamefish species caught under GFAA Record Requirements, Rules and Regulations and Line Categories.

FLY ROD CATEGORIES

Australian fly rod records are maintained according to tippet strength of line used by the angler. The tippet is wet tested using the same procedure as for other lines.

Records are kept for the same recognised saltwater and freshwater species in the following tippet classes: 1kg, 2kg, 3kg, 4kg, 6kg, 8kg, 10kg and 15kg.

Note: For 15kg tippet please refer to Rules for Flyfishing – Equipment Regulations – subsection H for Tackle Regulations.

Regulations governing record catches

GENERAL INFORMATION

1. Protest applications on disputed existing records will be referred to the GFAA Executive for review. Its decision will be final. All GFAA decisions will be based upon the intent of the regulations.
2. In some instances an official (as defined in 'Weighing of Fish' – see overleaf) or a member of the GFAA Executive may request that the information supplied on a claim be rechecked. Such action is not to be regarded as doubt of the formal application, but rather as evidence of the extreme care with which GFAA investigates and maintains records.
3. GFAA reserves the right to reject an application for either a record or award and its decision shall be final.
4. Rejected applicants in relation to subsections 1 and 4 above will not be informed by the GFAA executive of the reason(s) for the rejection of their application.
5. The GFAA executive reserves the right to alter the regulations governing record catch and/or award applications as is required from time to time and in accordance with the requirements of the GFAA constitution.

SPECIES IDENTIFICATION

1. If there is the slightest doubt that the fish cannot be properly identified from the photographs and other data submitted, the fish should be examined by a qualified scientist or retained in a preserved or frozen condition until a qualified authority can verify the species, or until notified by GFAA that the fish need no longer be retained.
2. In the case of a disputed identification, photographs of the catch will be submitted to two qualified authorities for their decision. When a question of identification arises, the angler will be notified and given ample opportunity to submit further evidence of identification.

WITNESS TO CATCH

1. On all record claims, witnesses to the catch are highly desirable, if at all possible. Unwitnessed catches may be disallowed if questions arise regarding their authenticity.
2. It is important that the witnesses can attest to the angler's compliance with the GFAA Angling Rules and Regulations.

WEIGHT REQUIRED TO DEFEAT OR TIE AN EXISTING RECORD

1. To replace a record for a fish weighing less than 11kg, the replacement must weigh at least 50g more than the existing record.
2. To replace a record for a fish weighing 11kg or more, the replacement must weigh at least one half of one per cent more than the existing record. Examples: At 10kg the additional weight required would be 50g. At 50kg the additional weight required would be 250g.
3. Any catch that matches the weight of an existing record or exceeds the weight by less than the amount required to defeat the record will be considered a tie. In the case of a tie claim involving more than two catches, weight must be compared with the original record (first fish to be caught). Nothing weighing less than the original record will be considered.
4. Estimated weights will not be accepted (refer to 'Weighing of Fish' – see below). Fractions of grams will not be considered.

MINIMUM WEIGHTS

For gamefish to be eligible for a vacant GFAA record they must be at least equal in weight to the line or tippet class in which the record is claimed. For sharks or rays to be eligible for a vacant GFAA record they must be at least twice the weight of the line or tippet class in which the record is claimed.

SPECIES IDENTIFICATION

Recognition of the capture of an Australian record may not be granted by GFAA until after two months from the date of the capture of the fish. Any claim received by GFAA more than two months after the date of the capture will be considered only if the delay is caused by extenuating circumstances. If an incomplete record claim is submitted, it must be accompanied by an explanation of why certain portions are incomplete.

An incomplete claim will be considered for a record if the following conditions are met:

1. The incomplete claim with explanations of why portions are incomplete must be received by GFAA within the time limits specified above.
2. Missing data must be due to circumstances beyond the control of the angler making the record claim.
3. All missing data must be supplied within a period of time considered to be reasonable in view of the particular circumstances. Final decisions on incomplete claims will be made by the Executive of GFAA.
4. A late payment fee of \$110.00, where applicable, will be charged to whoever has caused the delay: Angler, Club or State.

WEIGHING OF FISH

1. All captures shall be weighed by either a Club Weighmaster, a Club Recorder, a Club Committee Member in the location at which the fish was caught or by a GFAA or IGFA Official, or by a recognised local person familiar with the scale.
2. Disinterested witnesses to the weight should be used whenever possible. The weight of the sling, platform or rope (if one is used to secure the fish to the scales) must be determined and deducted from the total weight.
3. No estimated weights will be accepted. Fish weighed at sea or on other bodies of water will not be accepted.
4. All fish that are subject to record applications should be weighed on a scale that has been checked and certified for accuracy by a government department or other qualified organisation. All scales must be regularly checked for accuracy and certified. *Note: the certification of the scale should not be more than one year old. However, if at the time of weighing the fish, the scale has not been properly certified within one year, it should be checked for accuracy as quickly as possible. A report stating the findings of the inspector prior to any adjustments of the scale must be included with the record application.*
5. GFAA reserves the right to have any scale recertified for accuracy if there are any indications that the scale might not have weighed correctly.
6. If there is no official government inspector or accredited commercial representative available in the area where the fish is weighed, the scale must be checked by weighing objects of recognised and proven weights. Objects weighed must be at least equal to the weight of the fish. Substantiation of the correct

weight of these objects must be provided to GFAA along with the names and complete addresses of accredited witnesses to this entire procedure.

- Only weights indicated by the graduations of the scale will be accepted. Visual fractionalising of these graduations will not be allowed. Any weights that fall between two graduations on the scale must be recorded as the lower of the two.
- In remote areas where no weighing scales are available, an angler is permitted to use his own scale provided that it is of acceptable quality and has been properly certified. Note: State branches may prescribe minimum weights for the recording of fish within a state.
- Scales used to weigh fish must be attached to an object or weigh station that is fixed or mounted on a solid base attached or connected to the ground. In the case of a mobile crane or similar apparatus the displayed weight must remain stable for a minimum of 5 seconds.

PREPARATION OF RECORD CLAIM

At the time of weighing a fish, all tackle and equipment used in the capture, including gaffs, leader/trace, lure and a sample of line, shall be submitted to an official (as defined in 'Weighing of Fish') for examination, measuring, photographing or tracing of hook and lure.

An application for an Australian record must be made on the prescribed form.

The form must be completed in full and include the following:

- The name, address and signature of the angler.
- The date and approximate location of capture.
- The gross weight of the fish and sling, platform or rope; the separate weight of the sling, platform or rope; and the net weight of the fish.
- The overall length of the fish, the short length of the fish (measured from the point of the lower jaw to the crotch of the tail) and the maximum girth measurement (at the thickest part of the body, usually behind the pectoral fin). Extreme care should be exercised in measuring the fish as the measurements are often important for other scientific studies. (A measurement diagram is shown on the application form.)
- The length of double line, length of trace, type of lure, number of hooks used and the type of hook used in the capture.
- The specified strength of the line used to catch the fish. This will place the claim in a GFAA line class category. The line must test in this category or the application will be disallowed. The heaviest line strength permissible is 60kg.
- The signature of the boatman or fishing companion as witness that the fish was caught by the angler on the tackle described in the application, strictly in accordance with the GFAA Angling Rules and Equipment Regulations.
- The signature of the official (as defined in 'Weighing of Fish') attesting to the correctness of all the information contained in the application form.
- The application must be forwarded to the Recorder of GFAA through the state branch in whose waters the capture was made, and must be accompanied by:
 - A Statutory Declaration stating that the rules and regulations of GFAA were strictly observed in the capture.
 - The entire leader, the double line, and at least 16m of the single line closest to the double line, leader or hook. All line samples and the leader (if one is used) must be submitted in

one piece. If a lure is used with the leader, the leader should be cut at the eye attachment to the lure. (Refer to rule H1 in the GFAA Angling Rules and Regulations.)

Clarification: *The leader must be submitted in one piece with the hook attached, if a lure is to be removed then the leader should be cut on an angle at least 25mm above the eye of the hook so that both pieces of the leader can be re-joined to check the length.*

Note: *each line sample must be in one piece. It must be submitted in a manner that can be easily unwound without damage to the line. A recommended method is to submit the line on a piece of stiff cardboard. Write the angler's name and specified strength of the line used on the cardboard. Do not submit the line in a hank. Any sample submitted that can't be unwound will not be accepted (see diagram).*

- All applications for flyfishing records must be accompanied by the lure, the entire tippet and the entire leader, along with 25mm of the fly line beyond the attachment to the leader. These components must be intact and connected. **GFAA no longer requires that 25mm of fly line be attached to the leader.** If a loop to loop connection is used, the angler need only unloop the leader from the fly line and submit it with the record application. The entire leader, however must still be intact with the fly attached.
- Photographs showing the full length of the fish, the rod and reel used to make the catch, and the scale used to weigh the fish. A photograph of the angler with the fish is also required.

So that there can be no doubt about species identification, the clearest possible photos should be submitted. This is especially important in the cases of marlin, trevally, shark, tuna and other fishes that may be confused with similar species. Shark applications should also include a photograph of the shark's head and the front teeth.

Photographs should be taken of the fish in a hanging position and also lying on a flat surface on its side. In both types of photos no part of the fish should be obscured.

When hanging, the fish should be broadside to the camera with the fins fully extended and with the tip of the jaw and sword or spear clearly shown. Do not hold the tip of the fin. Do not stand in front of the fish. Do not hold the fish in your hands. A sky background for the fish is most desirable. Backgrounds cluttered with objects and people may complicate identification and detract from the photograph.

When photographing a fish lying on its side, the surface beneath the fish should be smooth, with a ruler or marked tape placed beside the fish if possible. Photographs from various angles are most helpful.

An additional photograph of the fish on the scale with actual weight visible helps to expedite the application. Photos taken during daylight are highly recommended.

- (e) Where a two-hook rig was used, a photo or tracing of the actual hook arrangement indicating the measurements.
- (f) Where a plug or artificial lure was used, a photograph of the plug or lure, indicating the measurement. If this is not completely satisfactory, the plug itself may be requested. (Refer to rule H1 in the GFAA Angling Rules and Regulations.)
- (g) Applications for Australian Freshwater and Saltwater Fly Rod records shall be on the same basis as applications for other GFAA records.
- (h) Where a capture is the subject of a claim for both a World and an Australian record both appropriate filing fees are payable.
GFAA shall issue a certificate for each capture that is approved as an Australian record, or a tie for an Australian record.

WORLD RECORDS

A claim for both an Australian and World Record must be forwarded to the Recorder of GFAA through the state branch in whose waters the capture was made. The claim must be made on both the GFAA prescribed form and on the IGFA 'Form for Recording Record Game Fish Catches', which may be obtained from the Secretary of a state branch or affiliated clubs, or from GFAA.

Application forms must be completed in every detail personally by the angler, and must be accompanied by:

- (a) an affidavit attested by a notary public or justice of the peace;
 - (b) line samples as for a GFAA record;
 - (c) photographs as for a GFAA record; and
 - (d) a filing fee as specified on the IGFA application form.
- NOTE: It is required that the filing fee be paid by credit card by filling in the details on the IGFA World Record Claim Form. Claims will not be accepted by IGFA if the date of the catch is more than three months before the date of receipt of the claim by IGFA.

IGFA requires that the claim be witnessed by a representative of IGFA, or a club official, if available.

IGFA Rules and Regulations change from time to time, and anglers are advised to check these before submitting a claim.

Any deliberate falsification of an application will disqualify the applicant from any future IGFA World Records.

On acceptance of a World Record, an Australian record will be granted, provided that it meets the GFAA requirements and was applied for on the prescribed form.

AFFILIATED CLUBS

All clubs affiliated with the state branches must adopt GFAA rules as part of their constitution.

Where a non-member angler captures a fish that obviously approaches a World Record, affiliated clubs are asked to cooperate to see that the fish is properly weighed, measured, witnessed, photographed and registered according to the requirements of IGFA.

Appendix A

TESTING OF LINES FOR AUSTRALIAN RECORDS

1. The line testing will be conducted on a GFAA-approved machine or by an approved testing laboratory in accordance with the Australian Standard AS2001-2.7 Determination of Breaking force and extension of yarns.
2. The Standard AS2001-2.7 will be varied to reduce the number of tests on each sample to not less than three (3) and not more than five (5).
3. The line will be conditioned prior to testing by soaking for two hours in distilled water complying with British Standard BS 3978 (1966).
4. The mean of the tests will be calculated and this figure will be the accepted test figure for the determination of the claim.

PRECIS OF THE AUSTRALIAN STANDARD AS2001-2.7

1. The machine on which testing will be conducted will be constantly rate-of-extension type, complying with the requirements of Grade B machines specified in Australian Standard 2193.
2. The test specimen will be extended at a constant rate of 20cm (+/- 2cm) per minute.
3. Specimens will be tested using a gauge length of 500mm (+/- 1mm).
4. The fixed and moving jaws will be in the same plane and at right angles to the direction of traverse. Bollard jaws will be used, so constructed that they do not damage the test specimen.

GFAA eligible gamefish species – Tag & Release

BY SPECIES

Albacore

Thunnus alalunga

Amberjack

Seriola dumerilii

Barracuda

Sphyraena spp.

Bonito

Sarda spp.

Broadbill swordfish

Xiphias gladius

Cobia

Rachycentron canadum

Eagle ray

Myliobatis australis

Mackerel, broad barred

Scomberomorus semifasciatus

Mackerel, narrow barred

Scomberomorus commerson

Mackerel, shark

Grammatorcynus bicarinatus

Mackerel, spotted

Scomberomorus spp.

Mahi mahi (dolphinfish)

Coryphaena spp.

Marlin, black

Istiomompax indica

Marlin, Pacific blue

Makaria nigricans

Marlin, striped

Kajikia audax

Rainbow runner

Elagtis bipinnulatus

Sailfish

Istiophorus platypterus

Samson fish

Seriola hippos

Shark, blue

Prionace glauca

Shark, gummy

Mustelus antarcticus

Shark, hammerhead

Sphyrna spp.

Shark, mako

GFAA Australian record application

Form for recording freshwater and saltwater gamefish catches

Read all GFAA Angling Rules and Requirements before completing and signing this application. The angler's signature on the completed form must be witnessed by a notary. This application must be accompanied by line or tippet samples complete with double, leader and hooks; clear photographs as specified in the GFAA Record Requirements; current certification of the scale on which the fish was weighed; and the filing fee. If the lure does not accompany the claim, then a photograph of the rig and a sized drawing of the lure must be included. Hybrids and other species that may pose a problem of identity should be examined by an ichthyologist or qualified fishery biologist.

I am submitting this application for: (tick those that apply)

Signature of examining ichthyologist:

Address: _____

Statutory Declaration

Name: _____

Address: _____

Occupation: _____

I do solemnly and sincerely declare that the fish described in this application for an Australian record was hooked, fought and brought to gaff by me without assistance, that it was caught strictly in accordance with the rules of the Game Fishing Association of Australia, and that the line submitted with this application is the actual line used to catch the fish. I further declare that I am a financial member of a gamefishing club or a gamefishing division within a club affiliated with GFAA.

And I make this solemn declaration by virtue of the Statutory Declaration Act 1959, and subject to the penalties provided by that Act for the making of false statements in Statutory Declarations, conscientiously believing the statements contained in this declaration to be true in every particular.

Signed: _____

Declared at: _____ the day of _____ 20 _____

Before me: _____

Title: _____

If a Small Fry/Junior record application, give the applicant's date of birth: _____

The following items must accompany this claim:

1. The first 16m of the actual line used in the capture, including the entire double line and the leader.
2. A full-length photograph of the fish showing dorsal and pectoral fins, angler and tackle used and scales.
3. Photograph showing the teeth of shark.
4. Photograph/tracing of any two-hook arrangement used and lure showing the necessary arrangements and measurements.
5. Certificate of scales.
6. Filing fee of \$20 (incl. GST) payable to GFAA for each record claim. Heaviest in line class category also requires an additional \$20 fee above the record claim fee.
7. Additional filing fee of \$27.50 (incl. GST) for 10 to 1, 15 to 1 and 20 to 1 claims.
8. Additional filing fee of \$110.00 (incl. GST) for 1000lb claim.
9. A late fee of \$110 will apply for record claims received after 60 days from capture date and will only be accepted up to 30 days after the deadline if extenuating circumstances can be shown. Payable to GFAA by whoever caused the delay.
10. Additional filing fee of \$10 payable to GFAA for each IGFA world record claim submitted through GFAA.

The application must be forwarded to the Recorder of GFAA through the State branch in whose waters the capture was made.

Note: This Statutory Declaration must be witnessed by a JP or an authorised Notary.

Note: Late fee will apply unless claim reaches GFAA within two (2) month of capture except in extenuating circumstances.

Records Officer's Report CURRENT AS AT 20TH JANUARY 2025

Season 2023/2024 has seen 62 claims submitted which included 8 World claims & only 4 claims rejected.

Records are being updated as they are approved on the GFAA site (www.gfaa.asn.au) anglers can check the web for the most current list.

GFAA claims featured 17 male, 4 female, 10 junior male, 2 junior female, 12 small fry male & 14 small fry female records along with 1 -10/1, 1 -20/1, 2 - ATL, 1- HLC & 7 Fly claims.

Claims submitted by states as follows: 38 West Australia, 4 New South Wales, 3 Queensland, 1 Tasmanian, 7 South Australian, 5 Victorian & 4 Northern Territory.

Some of the outstanding captures & achievements for the year included:

- Steve Marland M4 – 32.2kg Gummy Shark (Aust)
- Mia Grasso SFF6 – 72.35kg Hammerhead Shark (World & Aust)
- Jazz Miller F37 – 146.85kg S.B.T. (World & Aust)
- Dean Gates SFM1 – 6.48kg Mahi Mahi (Aust)
- Judy Sillis F60 & All tackle – 248.20kg Thresher Shark (Aust)

The GFAA President & Executive congratulates all successful record anglers & look forward to more claims from affiliated anglers in the following years.

Peter Babarskas

AUSTRALIAN HISTORICAL RECORDS

Historical Records

In 1977 the GFAA executive of the day recognised that stocks of grey nurse sharks were in trouble, and from then on the species would no longer be recognised as a capture species for record claim purposes. From the commencement of the NSW Fisheries tag & release program the grey nurse was determined by the GFAA as a tag & release species only. However, in November 2002, with advice from the GFAA, the NSWGFA deleted grey nurse sharks from tag & release also.

GFAA COMMUNICATIONS

Keeping you informed

GFAA uses several communications channels to keep in touch with affiliated anglers, their clubs and State Associations.

These communications paths are:

GFAA APP

For all GFAA Affiliated anglers

For iOS and Android devices the app complements the GFAA website www.gfaa.asn.au.

Up-to-date records, rules and fish identification, offshore and immediately.

THE ASSOCIATION'S WEBSITE

www.gfaa.asn.au has all the GFAA data, rules, Juniors links, GFAA, state and club contacts, the latest news and updated records.

THE ANNUAL GFAA JOURNAL

Published in hard copy and electronically. Includes items of interest, contacts, records, rules and awards. The Journal is circulated to those with an interest in the Association's objectives and activities, of the Association and its objectives. The 2025 Journal can be downloaded from: www.gfaa.asn.au/journal/all

FACEBOOK

What is happening now.

The news and information for all to participate in. www.facebook.com/gamefishingassociationofaustralia

KIDS FISH 2

Kids Fish 2, an initiative of GFAA launched in 2022 supports and encourages kids to get out and catch fish - any fish.

More: kidsfish2.com.au

JUNIORS

GFAA Juniors have their own website section: gfaa.asn.au/juniors/junior-tournament-information

and Facebook page: www.facebook.com/gfaajunior/
